Health Brokerage event 5/6th of May (on-line)

The banner features the European Union flag and the text 'EUROPEAN UNION' in the top left. The main title 'HORIZON EUROPE' is in large, bold, white letters. Below it, 'INFO DAYS 2025 BROKERAGE EVENT' is written in white, followed by 'CLUSTER 1 | HEALTH'. The bottom of the banner includes 'THE EU RESEARCH & INNOVATION PROGRAMME 2021 - 2027'. The background shows various people in white lab coats and casual wear, some holding magnifying glasses, others looking at a screen, and a small rocket in the sky.

Pre-publication of work programme 2025

The 'main' Horizon Europe work programme 2025 and the amended Horizon Europe 'main' work programme 2023-2025 have been pre-published.

These drafts have not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission.

The adoption of the Horizon Europe 'main' work programme 2025 and the amended Horizon Europe 'main' work programme 2023-2025 is planned for May 2025.

Funding and Tenders Portal

The screenshot displays the European Commission's EU Funding & Tenders Portal. The main navigation bar includes links for Home, Funding, Procurement, Projects & results, News & events, Work as an expert, and Guidance & documents. The 'Funding' section is active, showing a breadcrumb trail: Home > Funding > Calls for proposals. The page title is 'Calls for proposals', with a subtitle explaining that these are funding opportunities issued by the European Union institutions, agencies, and bodies. A 'More details' link is provided. On the right, a 'Partner search announcements' box indicates 105 searches of partners to collaborate on this topic, with a 'View / Edit' link. Below the main content, a 'Filters' section shows '239 item(s) found'. A 'Quick search' bar is present. The 'Programme' filter is set to 'Horizon Europe (HORIZON)'. A list of calls for proposals is shown, including 'European Researchers' Night and Researchers at Schools 2026-2027' (HORIZON-MSCA-2025-CITIZENS-01-01) and 'MSCA Staff Exchanges 2024' (HORIZON-MSCA-2024-SE-01-01). Each entry includes the opening date, next deadline, and stage type.

WP2025

Destination 1- Staying healthy in a rapidly changing society

Improving the quality of life of persons with intellectual disabilities and their families

Destination 2 - Living and working in a health-promoting environment

The impact of pollution on the development and progression of brain diseases and disorders

Advancing knowledge on the impacts of micro- and nanoplastics on human health

WP2025

Destination 3 - Tackling diseases and reducing disease burden

Randomised controlled trials to test safety and efficacy of phage therapy for the treatment of antibiotic-resistant bacterial infections

Advancing innovative interventions for mental, behavioural and neurodevelopmental disorders

Development of antibodies and antibody-derived proteins for the prevention and treatment of infectious diseases with epidemic potential

WP2025

Destination 3 - Tackling diseases and reducing disease burden

Leveraging artificial intelligence for pandemic preparedness and response

Support for the functioning of the Global Research Collaboration for Infectious Disease Preparedness (GloPID-R) **(CSA)**

Implementation research addressing strategies to strengthen health systems for equitable high-quality care and health outcomes in the context of non-communicable diseases (GACD)

Tackling high-burden for patients and under-researched medical conditions

WP2025

Destination 3 - Tackling diseases and reducing disease burden

*European Partnership for Brain Health (**COFUND**)*

*European partnership fostering a European Research Area (ERA) for health research (Phase 2) (**COFUND**)*

Destination 4 - Ensuring equal access to innovative, sustainable, and high-quality healthcare

End user-driven application of Generative Artificial Intelligence models in healthcare (GenAI4EU)

WP2025

Destination 5 - Developing and using new tools, technologies and digital solutions for a healthy society

Enhancing cell therapies with genomic techniques

Advancing cell secretome-based therapies

Leveraging multimodal data to advance Generative Artificial Intelligence applicability in biomedical research (GenAI4EU) Boosting the translation of biotech research into innovative health therapies

WP2025

Destination 6 - Maintaining an innovative, sustainable, and competitive EU health industry

Optimising the manufacturing of Advanced Therapy Medicinal Products (ATMPs) **(IA)**

Digitalisation of conformity assessment procedures of medical devices and in vitro diagnostic medical devices **(CSA)**

Facilitating the conduct of multinational clinical studies of orphan devices and/or of highly innovative (“breakthrough”) devices

Mission Cancer

Sustained collaboration of national and regional cancer funders to support the Cancer Mission through early translational research (**CSA**)

Understanding the effects of environmental exposure on the risk of paediatric, adolescent and young adult cancers

Innovative surgery as the cornerstone of multi-modal therapeutic interventions benefitting cancer patients with metastatic disease

Mission Cancer

Investigator-initiated multinational early-stage innovative clinical trials for paediatric cancer

Pragmatic clinical trials to enhance the quality of life of older cancer patients (65 years and older) through nutrition

Support to the network of National Cancer Mission Hubs (NCMHs) (**CSA**)

Topic 2: Towards precision medicine: platform for transdiagnostic stratification of brain dysfunction

Expected outcomes

The action generated by this topic is expected to contribute to all the following outcomes:

1. A sustainable and collaborative large, multimodal data platform that can identify novel transdiagnostic candidate markers and endpoints for the symptom domains of reward/motivation (including anhedonia) and impulsivity (RM&I) [1],[2] in neuropsychiatric, neurodegenerative, and physical health disorders. Relevant disorders include Alzheimer's disease (AD), major depressive disorder (MDD) and obesity (priority areas). Other relevant disorders/diseases include but are not limited to substance use disorders, schizophrenia, bipolar disorder, borderline personality disorder and Parkinson's disease. For a disorder/disease to be relevant, there must be evidence to show that reward/motivation and/or impulsivity are clinically significant symptom domains;

Research scope of the Thermochemical Process Group at the Latvian State Institute of Wood Chemistry

Different thermochemical processes produce a vast array of biomass-based products from wood, lignin and other raw materials. LSIWC is equipped with laboratory and pilot scale equipment for performing various pyrolysis processes, including, catalytic and over-heated steam promoted, as well as hydrothermal carbonisation. Additionally, qualitative and quantitative characterisation of the obtained products is ensured. These processes can be integrated in a cascade biorefinery, and, depending on the process conditions, they provide such products as bio-char, nanostructured carbon materials and pyrolysis liquids (bio-oil), which are a source of valuable chemicals (anhydrosugars, such as, levoglucosan, levoglucosenone, aldehydes, organic acids and phenol derivatives). The obtained carbon materials are also modified by chemical or physical activation, and doping with nitrogen and metals, to promote applications of biomass-based carbon materials for catalysis, as well as energy conversion and storage.

Applications of biomass-based carbon materials:

- Electrochemical devices – batteries, fuel cells, supercapacitors
- Bio-electrodes for hydrolysis to obtain hydrogen
- Activated carbon as a sorbent
- Support for heterogeneous catalysts
- Soil amendment and carbon sequestration

Liquid pyrolysis products as a source of green chemicals:

- Anhydrosugars – levoglucosan, levoglucosenone and others
- Aldehydes, incl., furan derivatives
- Organic acids, such as, levulinic acid
- Aromatic compounds (phenolic aldehydes and phenolcarboxylic acids, e.g., vanillin and vanillic acid)

We produce carbons on g/kg scale:

- Porous materials with $S_{BET} > 2000 \text{ m}^2/\text{g}$
- Hard carbon materials
- Biochar for multipurpose applications

Benefits of biomass-based carbon include feedstock availability, low cost, renewability and environmental friendliness. Biomass-based precursors have a hierarchical structure, which also contributes to the formation of the necessary porosity. Carbons are multifunctional materials for sorption, ion-exchange, complexing, electrochemical and catalytic applications.

SAGATAVO PITCH PREZENTĀCIJU

Sagatavojiet īsu un saprotamu prezentāciju par savu organizāciju/ideju – pitch.

Pāris minūtēs jums jāspēj paskaidrot, kas ir jūsu ideja, kāpēc tā ir svarīga un ko jūs meklējat.

Dodoties uz pasākumu, sagatavojieties rūpīgi:

Pārbaudiet savu prezentāciju vairākas reizes, lai tajā nav kļūdas!

Izmēģiniet, kā runājat un kā iekļaujaties laikā,

Esiet gatavi atbildēt uz dažādiem jautājumiem par savu ideju.

Esiet aktīvi un piedalieties savas jomas tīklošanās pasākumos.

Pasākumi ir lieliska vieta, kur iepazīt jaunus potenciālos partnerus, rast jaunas idejas un paplašināt savu kontaktu loku.

Prezentācija par to, kā veiksmīgi izveidot savu pitch, ir pieejama [Latvijas Zinātnes padomes \(LZP\) mājaslapā!](#)

PARTNERU MEKLĒŠANAS PLATFORMAS

Horizon Europe Dashboard

Interaktīva platforma, kurā redzami statistikas dati par visiem Apvārsnis Eiropa projektiem – to iesniedzējiem, partneriem, finansējuma sadalījumu u.c. Ļoti noderīga, lai identificētu aktīvus partnerus konkrētā tēmā vai reģionā.
