'will', 'should', 'are expected to' versus 'could', 'such as', etc.

Scope:

Games are fast growing, fast changing parts of industry known for their advanced role in ICT. Yet, although millions of Europeans play these games, the impact of games on European culture and society, as well as on its cohesion and values has not been thoroughly researched.

Research should address these gaps in knowledge, which include possible differences between age groups, gender and socioeconomic backgrounds, the current situation in game literacy or the digital divide. Games are a form of culture where new communication and languages, as well as new artistic expressions, are being developed in particular by younger generations. However, there is limited knowledge about the potential benefits and shortcomings of games in terms of learning and creativity. In today's ever-expanding market, games and emerging forms of play are involved in many aspects of our societies. However, research has neither sufficiently addressed the cultural value, impact, innovation potential, nor the possible risks for individuals and society that games can present. Proposals should address the risks brought by the digital game world on phenomena such as social exclusion, intolerance and harassment, with a view to possible policy options and actions.

Proposals should address the role of games in culture and in shaping European societies, their cohesion and values, with the objective of developing new knowledge and evidence for policymaking. Proposals should address legal and IPR issues linked to the gaming population and its creative work. Relevant stakeholders, including CCIs, other creatives, non-commercial interests and policy makers, should be involved to ensure the research and results respond well to the needs. This new knowledge and evidence should provide input for policymaking and for improved practices.

Proposal template Part B: technical description

(for full proposals: single stage submission procedure and 2nd stage of a two stage submission procedure)

Page limit: The title, list of participants and sections 1, 2 and 3, together, should not be longer than 30 pages. For topics using lump sum funding, the limit is 33 pages. All tables, figures, references and any other element pertaining to these sections must be included as an integral part of these sections and are thus counted against this page limit. The number of pages included in each section of this template is only **indicative**.

1. → Excellence #@REL-EVA-RE@#

Excellence—aspects to be taken into account.

- Clarity and pertinence of the project's objectives.
- Quality of the proposed coordination and/or support measures including soundness of methodology.

2. → Impact #@IMP-ACT-IA@#

Impact—aspects to be taken into account.

- Credibility of the pathways to achieve the expected outcomes and impacts specified in the work programme, and the likely scale and significance of the contributions due to the project.
- Suitability and quality of the measures to maximise expected outcomes and impacts, as set out in the dissemination and exploitation plan, including communication activities.

3. Quality and efficiency of the implementation

3.1 → Work plan and resources

Gender in research and innovation : statistics and indicators (atskaite)

- She figures regulāri ziņo par sieviešu un vīriešu karjeras attīstību un iespējām zinātnē un pētniecībā.
- ES Komisijas ziņojumā tiek uzraudzīta dzimumu līdztiesība pētniecībā un inovācijā Eiropā un ārpus tās, kā arī pastāvīgi sniegta informācija par faktisko situāciju.
- Ziņojumā She Figures Report-2024, kas publicēts 2025. gada 11. februārī, norādīts, ka sievietes joprojām atrodas tā dēvētajā “noplūdes līnijā”: lai gan situācija ir uzlabojusies, sieviešu īpatsvars zinātnē ievērojami samazinās, pieaugot karjeras līmenim.

ABOUT US

We are a research and education center (Center of Design Technology) situated at the Riga Technical University, Institute of Architecture and Design with a background in design, materials and technology field.

OUR EXPERTISE

Experience in design, product and learning materials development and implementation in the field of material science to the development of new materials, strategies, technologies and actions related to education, innovations and research.

WHY US?

We can offer a research and prototyping related to:

- ✓ textile and clothing,
- ✓ wood and composite materials,
- ✓ design thinking,
- ✓ new products development in the fields of public health and bioprotection,
- ✓ digital learning,
- ✓ defence and safety,
- ✓ sustainability.

OUR PROJECTS

AR4ReClothing project promoting environmental sustainability through gender equality.

<https://ar4reclothing.erasmusplus.website/>

DESIGN4CIRCLE project promotes innovative design practices for achieving a new textile circular sector

<https://design4circle.eu/>

ECOTEX promotes implementation of an innovative training toolkit for cooperation between education providers and businesses on circular economy in the textile industry.

EASE LAB

About us

We are a research lab situated at the University of Latvia Institute of Philosophy and Sociology with a background in philosophy and bioethics and training in qualitative research.

We conduct phenomenologically grounded qualitative research, which provides unique insights into embodied and social experiences, generating new knowledge in the fields of Public Health, Digital Health, and Health Services Research.

Our expertise

- 1 Experience in **phenomenologically grounded qualitative research** about individual's social and embodied experiences related to health care and public health.
- 2 Experience in the field of bioethics studying **ethical implications** connected to the development of new strategies, technologies and actions related to health, illness and prevention.

Why us?

We can offer a **unique approach to study users' experiences and ethical implications** connected to the development of new strategies, technologies and actions related to health, illness and prevention relevant in the fields of Public health, Health services research and Digital health among others.

The generated knowledge can inform **health policies and actions for health promotion and disease prevention**, which are knowledge-based, people-centred, personalised and thus targeted and tailored to individual's needs, and designed to reduce health inequalities.
