

EIE applications under the evaluator lens

Proposal writing and consortium design
for EIE CSA and PCP actions

19 August 2026

SECTION 01 / 04

01

EIE review

EIE: Excellent Ideas Are Not Enough

EIE funds credible mechanisms for ecosystem change, not isolated innovation activities.

What the proposal must prove

1 What is broken?

Fragmented transfer, weak scale-up pathways, slow adoption, underused procurement.

2 Who must behave differently?

TTOs, startups, public buyers, investors, universities, experimentation spaces, philanthropy.

3 What mechanism will change that?

Tools, pilots, services, procurement models, agreements, cross-border support structures.

4 What remains after the project?

Adopted practices, functioning partnerships, validated models, procurement pipelines, repeatable services.

Four EIE Opportunities Remain Open

€39 M across four open topics; one Co-fund pilot is already closed.

Evaluators Do Not Buy Activities. They Buy Confidence

The image shows a workspace with a laptop, a cup of coffee, and a printed evaluation summary. The laptop screen displays a 'Proposal Evaluation' interface for 'Call: HORIZON-CL3-2024-02'. The interface has a sidebar with 'Overview', 'Excellence', 'Impact', 'Implementation', 'Review', 'Documents', and 'History'. The main content area shows a table with columns for 'Criteria', 'Score', and 'Weight'. The criteria are 'Excellence', 'Impact', and 'Implementation', each with a score of 4.0/5 and a weight of 25%. The overall threshold is 12.5/15. The printed 'EVALUATION SUMMARY' table below the laptop also shows these scores and weights. Handwritten notes on the printed table include 'Synergies with other projects', 'Check page 15', 'Data mgmt plan - GDPR - FAIR', 'Budget justification - person months - travel', 'Ethics -> OK', 'STRENGTHS', 'WEAKNESSES / RISKS', and 'RECOMMENDATIONS'.

Criteria	Score (0-5)	Weight	Weighted Score	Comments
Excellence	4.5	25%	1.125	
Impact	4.0	25%	1.000	
Implementation	4.0	25%	1.000	
Overall Threshold	12.5 / 15		83.3%	

STRENGTHS

- Strong, ambitious objectives and sound methodology
- Clear added value and potential for significant impact
- Complementary consortium with relevant expertise

WEAKNESSES / RISKS

- Some milestones too close to each other
- Risk mitigation not fully detailed
- More clarity needed on exploitation ownership

RECOMMENDATIONS

- Clarify risk mitigation
- Strengthen exploitation plan and KPIs
- Ensure sufficient resources in WP3

WHAT THE EVALUATOR MUST BELIEVE

A fundable EIE proposal must make the evaluator believe:

01

The problem is real

Not generic, not assumed, not copied from the topic.

02

The mechanism can work

Activities clearly explain how behaviour will change.

03

The consortium can deliver it

Every partner has a necessary function.

04

The results will be adopted

Someone will use the models, services, practices or solutions after the project.

The proposal is not a brochure. It is an evidence-based argument for funding

SECTION 02 / 04

02

Consortium tips

A consortium is a Pit Crew, Not a Logo Wall

BEFORE ADDING ANY BENEFICIARY, ASK:

01 What would fail without them?

A pilot, a buyer group, startup access, TTO adoption, market validation, procurement execution.

02 What do they uniquely control?

Users, data, facilities, procurement authority, startups, investors, TTO cases, policy access.

03 Are they in the right role?

Beneficiary, associated partner, subcontractor, advisory board, pilot site, dissemination channel.

04 What evidence proves delivery capacity?

Past projects, committed cases, buyer mandate, startup pipeline, signed access, operational resources.

What would fail without them?

Do Not Start from Partners

WRONG ORDER

START WITH NAMES

- **Partner**
choose names
- **Activity**
invent tasks
- **Work Plan**
work packages
- **Hopefully impact**
assume the result

REVERSE ENGINEERING / **STARTUP EUROPE**

01

EXPECTED OUTCOME

Baltic startups enter new European markets

02

BEHAVIOUR CHANGE

They engage customers, investors and buyers outside their home country

03

INTERVENTION

Cross-border acceleration + market landing support

04

CAPABILITIES NEEDED

Startup pipeline • internationalisation • scale-up delivery • founder trust • destination-market access

05

PARTNERS COME LAST
WHO FITS THE CAPABILITIES?

?

?

?

?

?

BOTTOM LINE

If you cannot explain the capability, **you cannot justify the partner.**

Pick only 5 partners. No passengers allowed.

A LIAA (Latvia)

Latvia national agency for investment, innovation, exports and business internationalisation.

B TechChill (Latvia)

One of the best-known Baltic startup conferences, connecting founders, investors and the tech ecosystem.

C Fraunhofer (Germany)

Leading applied-research organisations, turning science and technology into industrial innovation.

D Startup Lithuania (Lithuania)

Lithuania national startup ecosystem facilitator, connecting startups, investors, accelerators, companies and government.

E Tehnopol (Estonia)

Estonian technology hub and accelerator helping technology companies grow, scale and enter new markets.

F Bolt (Estonia)

Estonian-born technology scaleup that expanded its mobility platform internationally.

G Startin.LV (Latvia)

Latvian Startup Association representing and connecting the national startup community.

H UnternehmerTUM (Germany)

Leading Munich innovation and startup hub connecting technology companies with customers, corporates and investors.

☐ Select all  Refresh

☐ Which of these would you choose for our con...

Pick only 5 partners. No passengers allowed.

A LIAA (Latvia)

Latvia national agency for investment, innovation, exports and business internationalisation.

B TechChill (Latvia)

One of the best-known Baltic startup conferences, connecting founders, investors and the tech ecosystem.

C Fraunhofer (Germany)

Leading applied-research organisations, turning science and technology into industrial innovation.

D Startup Lithuania (Lithuania)

Lithuania national startup ecosystem facilitator, connecting startups, investors, accelerators, companies and government.

E Tehnopol (Estonia)

Estonian technology hub and accelerator helping technology companies grow, scale and enter new markets.

F Bolt (Estonia)

Estonian-born technology scaleup that expanded its mobility platform internationally.

G Startin.LV (Latvia)

Latvian Startup Association representing and connecting the national startup community.

H UnternehmerTUM (Germany)

Leading Munich innovation and startup hub connecting technology companies with customers, corporates and investors.

More Partners, More Problems

A new beneficiary must reduce risk, not add noise.

+1

THE EXTRA PARTNER TEST

Add a beneficiary only if it brings at least one of these:

- | | |
|-------------------------------|---------------------------------------|
| 01 Missing capability | 05 Testing infrastructure |
| 02 Missing market access | 06 Missing evidence |
| 03 Missing geography | 07 Adoption / exploitation capacity |
| 04 Critical users or buyers | |

IF NOT, USE ANOTHER ROLE

Associated partner • subcontractor •
advisory board • event channel

BOTTOM LINE

Do not maximise consortium size.
Minimise unexplained complexity.

Know Who You Need. Then Find Them

01

Funding & Tenders Partner Search

Who is actively looking for this topic?

Funding & Tenders Portal → Partner Search

02

CORDIS / EU-funded projects

Who has already delivered similar work?

cordis.europa.eu/projects

03

NCPs + Brokerage Events

Who can introduce us to credible candidates?

horizoneuropencpportal.eu

04

Specialist Networks

Where does this capability already live?

TTO: astp4kt.eu | Startups: ebn.eu | Regions: errin.eu | RTOs: earto.eu |
Philanthropy: philea.eu | PCP: public-buyers-community.ec.europa.eu

05

Warm Referrals

Who do strong partners recommend?

06

Cold Calling

Why not?

Also useful: een.ec.europa.eu/partnering-opportunities

SECTION 03 / 04

03

Writing tips

The Document Everyone Reads Too Late

WORK PROGRAMME

What must the project achieve?

APPLICATION TEMPLATE

Where must each answer go?

EVALUATION FORM

How will the evaluator score it?

TARGET MINDSET

Build for **5/5**, not just “good enough”.

WARNING

Evaluators assess what is actually written, not what was intended.

Turn the Topic Into a Treasure Map

Methodology Is Not a To-Do List (Subsection 1.2)

✗ WEAK 1.2

ACTIVITY INVENTORY

WP2 selects startups

WP3 runs workshops

WP4 organises matchmaking

WP5 writes reports

✓ STRONG 1.2

A TESTABLE MECHANISM

EXAMPLE

If startups fail to scale because they lack **trusted buyer access**, the proposal must show:

- 01 how buyers are selected
- 02 how startups are matched
- 03 how meetings become pilots
- 04 how conversion is tracked
- 05 how the model improves after each cohort

BOTTOM LINE

Tasks belong in Implementation. Logic belongs in Methodology.

Impact Pathway ≠ Project Outcome (Subsection 2.1)

Section 2.1 must explain how TTO outputs become adopted practice.

WEAK 2.1

“3 pilot cases + 4 licensing clauses + final blueprint.”

That is a delivery list, not an impact pathway.

STRONG 2.1

Show what changes because the pilots work:

**01
Pilot cases**
generate
evidence

**02
Licensing
clauses**
tested in real
deals

**03
TTOs**
approve or adopt
the model

**04
Startups**
face lower
upfront barriers

**05
Blueprint**
is reused beyond
the consortium

More spin-offs and deep-tech startups bringing technologies to market

Stronger innovation ecosystem

Greater European competitiveness

Write Tasks Like Mini-Contracts (Work Plan)

PROJECT PLAN

TASK CHECKLIST

- ☒ Activity defined
- ☒ Owner confirmed
- ☒ Partners involved
- ☒ Timing set
- ☒ Resources validated
- ☒ KPI defined
- ☒ Dependencies checked

REMEMBER

- Buyer database
- Event plan
- Travel budget
- Reporting template

T3.2 German market validation

SCOPE

- 2 cohorts for 20-25 selected startups.
- 3-5 qualified buyer introductions
- 1 market-validation session
- 1 market-entry recommendation

OWNER

UnternehmerTUM

PARTNERS

LIAA, Tehnopol

TIMING

M10 - M24

RESOURCES

18 PM +
travel / event budget

KPI

≥ 20 startups complete
the process; ≥ 60 qualified
buyer introductions delivered

BUDGET OVERVIEW

Work Package / Task	Budget (EUR)
WP1 - Project Management	120,000
WP2 - Ecosystem Engagement	180,000
WP3 - Startup Acceleration	240,000
T3.2 - German market validation	95,000
WP4 - Matchmaking & Pilot Facilitation	150,000
WP5 - Impact & Evaluation	90,000
WP6 - Communication & Dissemination	80,000
TOTAL	955,000

KPI TRACKER

HORIZON-EIE-2027-01-CONNECT-01 • Startup Europe

A

Our methodology is based on one assumption: **Baltic startups** with traction do not mainly fail to scale because they lack generic training. They **fail because they lack trusted access to customers, investors and buyers** in target markets.

We will therefore **segment** selected startups **by market-readiness**, **match** them with **relevant buyer** and **investor** profiles, **test market-entry interest** through structured introductions, and use **cohort feedback** to adapt the support model after each cycle.

VS

B

WP2 will select **promising startups** based on clear criteria. WP3 will organise practical **training workshops**. WP4 will provide **tailored mentoring sessions**. WP5 will organise **matchmaking events** with investors and buyers to facilitate commercial and investment opportunities. WP6 will **prepare reports, communication materials** and **practical recommendations**.

A

Baltic deep-tech startups face a clear market-access gap. **64% struggle to secure first international customers**, while **48% cite fragmented procurement as a barrier** to cross-border growth (European Commission, European Innovation Scoreboard 2025, pp. 46-48).

In Moderate and Emerging Innovator ecosystems, technology startups are **1.7 times less likely to build relationships with foreign corporate buyers** (JRC, European Deep-Tech Scale-up Monitor 2025, p. 73).

Baltic2Markets will address this gap by supporting **80 traction-stage startups with market validation**, qualified buyer introductions and **landing support in Germany**.

VS

B

Baltic2Markets addresses a **cross-border scale-up challenge**: digital and deep-tech startups that have already demonstrated traction **still need effective connections to new European markets**, investors and public or corporate buyers.

The project will select **80 traction-stage startups** and provide structured **market validation, qualified buyer introductions** and landing support, **starting with Germany**. Support will focus on converting existing traction into **concrete cross-border growth opportunities** rather than providing generic incubation services.

Watch out for AI-generated references. Always double-check them

A

Baltic2Markets will support **250 startups, from early validation-stage ventures to early scaleups**, through bootcamps, mentoring, incubation and investor events.

The programme will build a strong pipeline of companies **progressing from business validation to investment readiness and international growth**, culminating in a **European Demo Day** in Berlin with curated introductions to **leading investors, including VCs such as Atomico, Balderton Capital and HV Capital**.

VS

B

Baltic2Markets will support **80 digital and deep-tech startups and scaleups demonstrating traction**, defined as product-market fit or at least a seed round raised.

Support will focus on **cross-border acceleration, market validation and connections with customers, investors and public or corporate buyers** in target European markets.

A

LIAA, as project coordinator, **will manage and monitor the financial support** provided to selected startups, including grant administration, payment records and reporting.

UnternehmerTUM will lead **German market-entry support**, while **Tehnopol** and **Startup Lithuania** will contribute to **startup selection, acceleration** and **follow-up**.

VS

B

UnternehmerTUM will manage the **financial support scheme** for selected startups, including grant administration, payments, compliance checks and monitoring, building on **its extensive experience** in running startup acceleration programmes.

LIAA, as project coordinator, **will oversee overall project reporting**, while **Tehnopol** and **Startup Lithuania** will support **company selection** and **programme delivery**.

A

Each participating TTO will create a **technology deal room where individual research assets are assessed**, professionally **packaged and matched** with suitable startups and investors.

For each asset, the TTO will prepare a **dedicated commercialisation profile** covering IP status, market opportunity, licensing conditions and investor readiness, enabling **tailored one-to-one negotiations with potential licensees**.

VS

B

Participating TTOs will **identify complementary intellectual assets** across research groups and organise them into thematic portfolios that can be **commercialised through package deals**.

Each portfolio will combine technologies, know-how and IP with a common market application, **allowing startups and investors to evaluate and negotiate access to a more complete commercial opportunity**.

SECTION 04 / 04

04

General tips

Our Style: Less Fluff. More Proof.

01 THE BROCHURE VERSION

**Ambitious. Positive.
Impossible to score.**

“ *Baltic2Markets will unlock the full potential of the Baltic innovation ecosystem by empowering ambitious startups to scale beyond national borders. Through a unique European acceleration experience, the project will create meaningful connections with leading investors, corporates and innovation actors, opening new pathways for sustainable international growth and positioning Baltic ventures at the forefront of European innovation.*

THE EVALUATOR STILL HAS TO ASK:

How many? • Which companies? • What support?
What evidence? • What measurable result?

02 THE FUNDABLE VERSION

CREDIBLE.

“ *Baltic2Markets will support 80 Baltic digital and deep-tech startups and scaleups that have already demonstrated traction. The need for cross-border support is measurable: 70% of EU SMEs still operate only in their domestic market, while only 26% are active in other EU Member States¹. Each selected company will receive 3-5 qualified introductions to customers, corporate or public buyers and investors in target markets, starting with Germany. We will track conversion into follow-up meetings, pilots, investment discussions and market-entry decisions.*

¹ European Commission, Flash Eurobarometer 559, Start-up, Scale-up and Entrepreneurship**, 2025.** The Commission survey covered more than 17,000 companies and reports that 70% of EU SMEs operate domestically while around a quarter are active elsewhere in the Single Market.

Specific target → quantified need → defined intervention → tracked conversion

Fresh Eyes Find Expensive Mistakes

01 INTERNAL CROSS-CHECK

Inside the organisation,
outside the writing team

Someone who did not draft the proposal checks:

- Topic fit and compliance
- Contradictions and unsupported claims
- Budget and partner logic
- Overall consistency

02 EXTERNAL EVALUATION

Independent from the project
and its assumptions

*No bias from knowing what the project **meant** to say. Ask for:*

- Evaluation-style score
- Main weaknesses and red flags
- Missing evidence
- Priority fixes

BOTTOM LINE

The first unbiased reader **should not** be the EC evaluator.

Your proposal's toughest test before you submit

Ruthless Evaluator simulates how your proposal will be assessed. It checks alignment with the Work Programme, the official template, and the criteria used in the evaluation form, enhanced by structured review logic informed by real-world EU funding experience. It flags issues that may cost you points and provides actionable recommendations before submission.

[Get started](#)[See how it works](#)

The only evaluator that doesn't flatter before rejecting.

Criteria	Overall	Excellence	Impact	Implementation			
Project evaluators	90.72	91.43	88.13	92.59			
Filter by program	All programs	All evaluators	Last evaluated	1 desc			
Project	Program	Last evaluated	Evaluator	Overall	Excellence	Impact	Implementation
Agri-400	DC Agri-400	6/20/2020, 1:32	Ruthless	90.72	91.43	88.13	92.59
Global risk profile and mitigation	80% Very Good						
Summary: Comprehensive, actionable risk management plan.							
Strengths:							
• Specific technical and operational risks with concrete mitigations.							
• DSMB and expedited reporting frameworks defined.							
• Partner execution and market entry risks recognized with governance responses.							
Weaknesses:							
• No quantitative provided.							
Recommendations							
• Add a gender balance baseline and targets, with actions to improve diversity at senior and technical levels.							
• Map expertise gaps to WPs and specify hiring plans, profiles, and timing to close them.							
• Detail and clinical operations org chart and regional coverage to manage >100 sites efficiently.
