EXPLORE HORIZON EUROPE: EUROPEAN COMMISSION'S PERSPECTIVE ON OPPORTUNITIES FOR LATVIAN PARTICIPANTS

RIGA STRADIŅŠ UNIVERSITY,
DZIRCIEMA STRĒET 16,
AUDITORIUM "HIPPOCRATES"

15 March 2024

EXPLORE HORIZON EUROPE: EUROPEAN COMMISSION'S PERSPECTIVE ON OPPORTUNITIES FOR LATVIAN PARTICIPANTS

- 9:00** **Welcome and Agenda**
- 9:10** Overview on Horizon Europe (EC, Agnese Boscarol), Q&A
- 9:45** How to find an opportunity matching my interests?
How to find partners for a consortium? (EC, Agnese Boscarol), Q&A
- 10:30** **Coffee break**
- 11:00** How to write a good proposal – tips and tricks
(EC, Agnese Boscarol), Q&A
- 12:00** **Lunch break**
- 13:00** The rules of the game for running my grant:
Financial aspects focusing on Personnel costs, Goods and services,
and Subcontracting (EC, Isabelle Leroy), Q&A
- 14:00** Can I get support for exploiting the results of my project?
(EC, Katrina Barkane), Q&A
- 14:30** Latvia participation in Horizon Europe
(Julija Asmuss, Horizon Europe National Contact Point Coordinator,
Latvian Council of Science)
- 14:40** Round table and discussion

HORIZON EUROPE

THE EU RESEARCH & INNOVATION PROGRAMME 2021 – 27

Overview on Horizon Europe

Agnese Boscarol

DG RTD H.3 – Common Implementation Centre
*Explore Horizon Europe: European Commission's
Perspective on Opportunities for Latvian
Participants Riga, 15 March 2024*

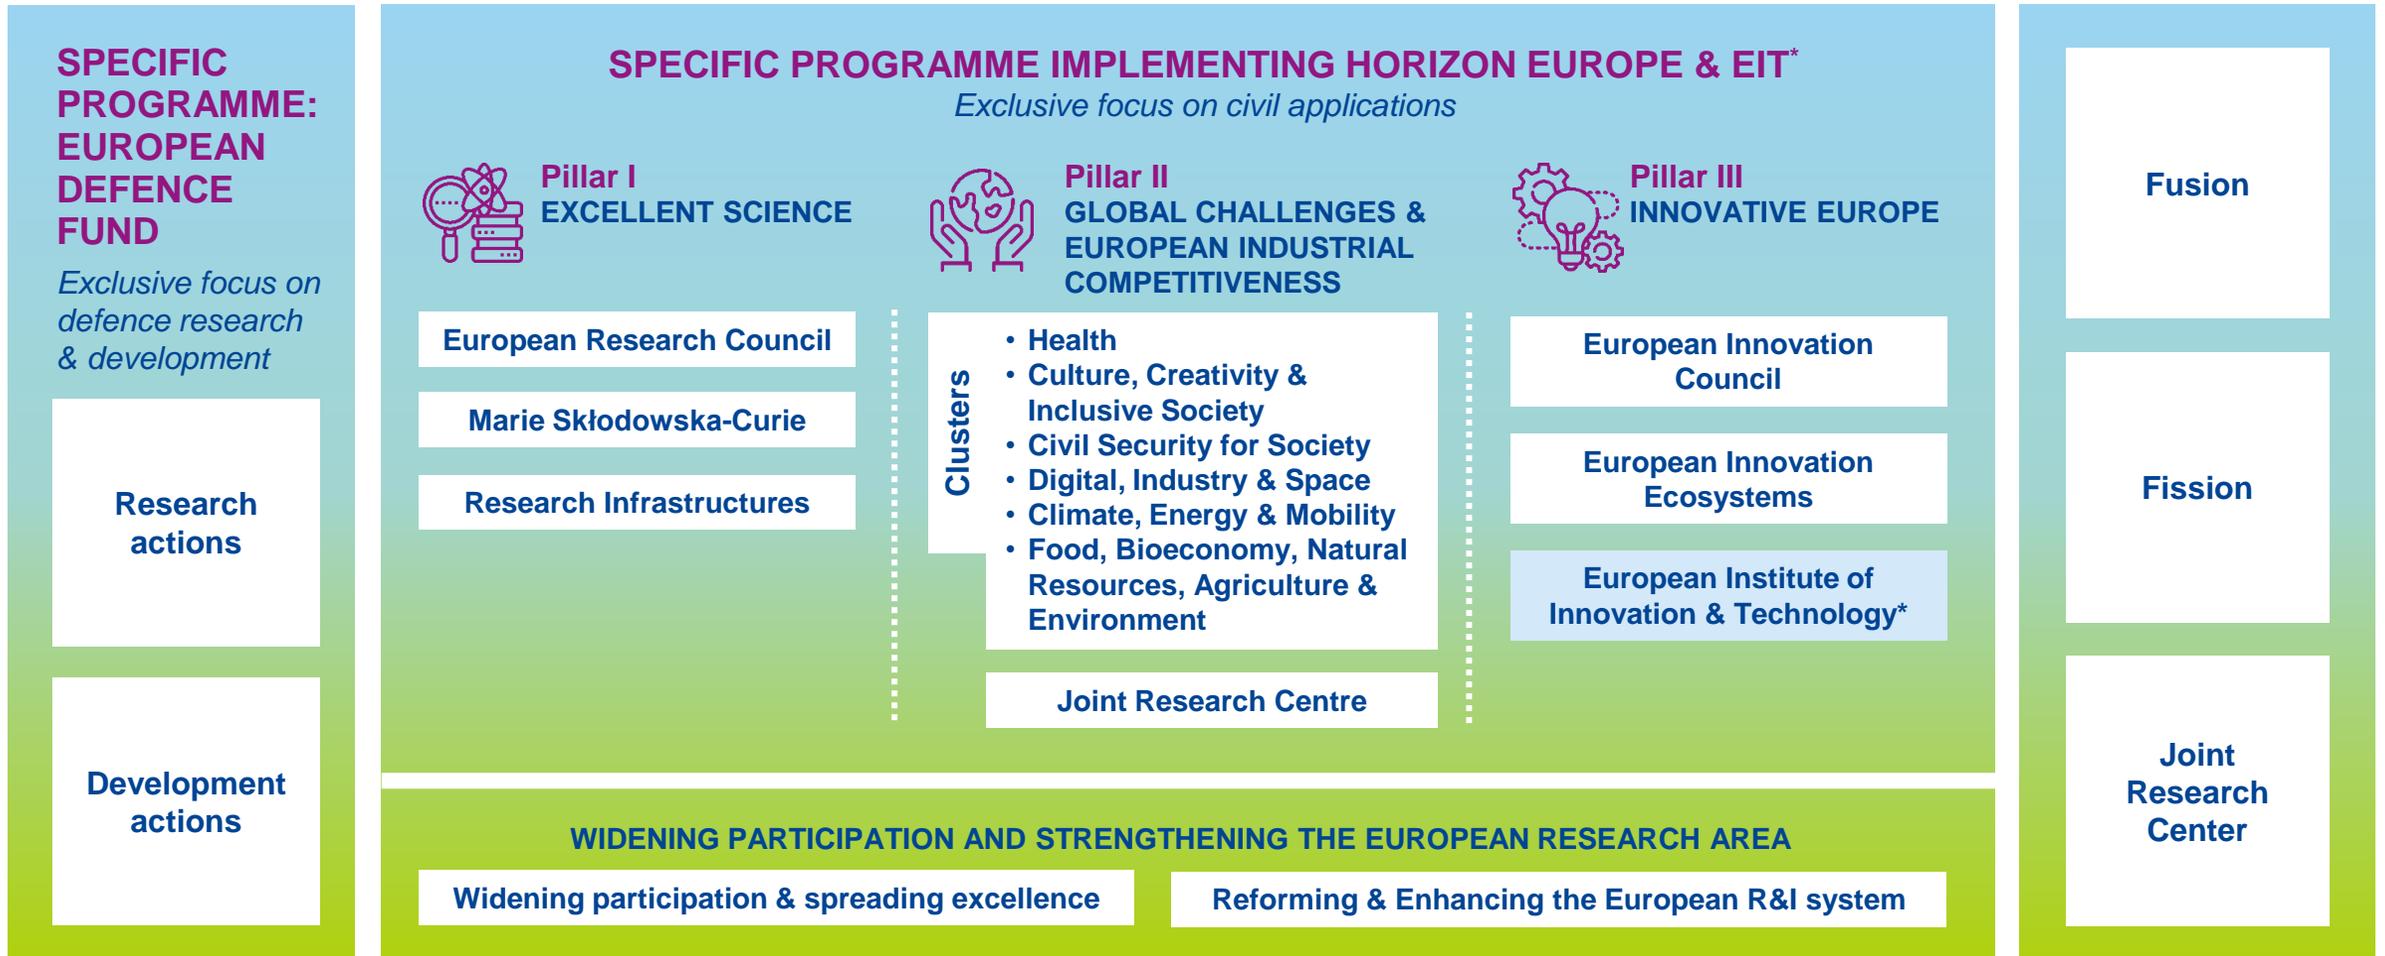

HORIZON EUROPE - OVERVIEW

Programme Architecture

HORIZON EUROPE

EURATOM

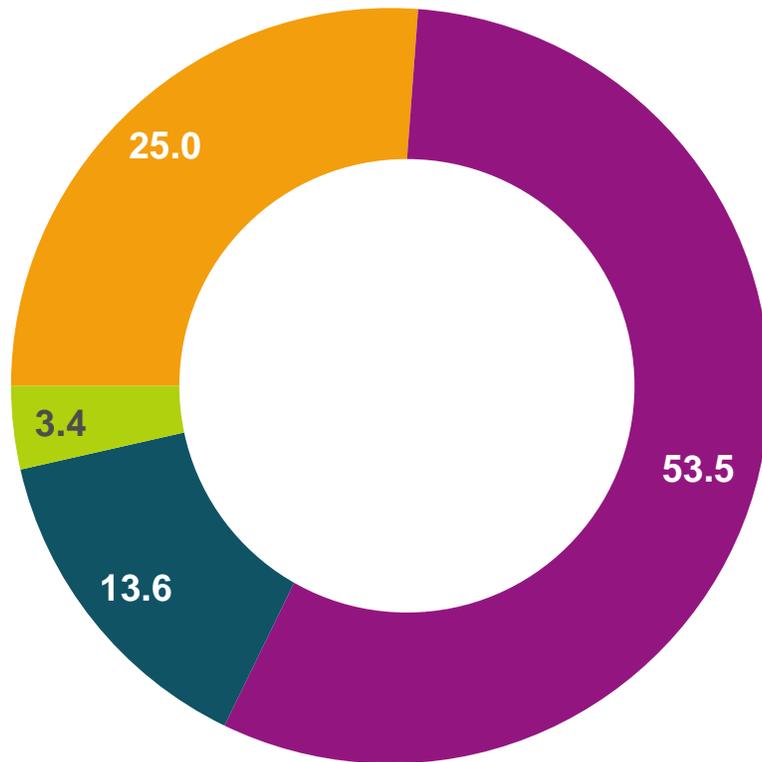

Legal basis:

Regulation (EU) 2021/695 establishing Horizon Europe; **Council Decision (EU) 2021/764** establishing the Specific Programme implementing Horizon Europe

* The European Institute of Innovation & Technology (EIT) is not part of the Specific Programme

Horizon Europe Budget: €95.5 billion (2021-2027)

(including €5.4 billion from NGEU – Next Generation Europe – programme of EU for Recovery from COVID-19 crisis)

Political agreement December 2020

€ billion in current prices

- Excellent Science - Pillar I
- Global Challenges & EU industrial competitiveness - Pillar II
- Innovative Europe - Pillar III
- Widening Participation & ERA - Programme Part

Pillar I – Excellent Science

Overview

reinforcing and extending the **excellence of the Union's science base**

European Research Council

Competitive funding to support investigator-driven frontier research across all fields, on the basis of scientific excellence

€16 billion

Marie Skłodowska-Curie Actions

Equipping researchers with new knowledge and skills through mobility and training

€6.6 billion

Research Infrastructures

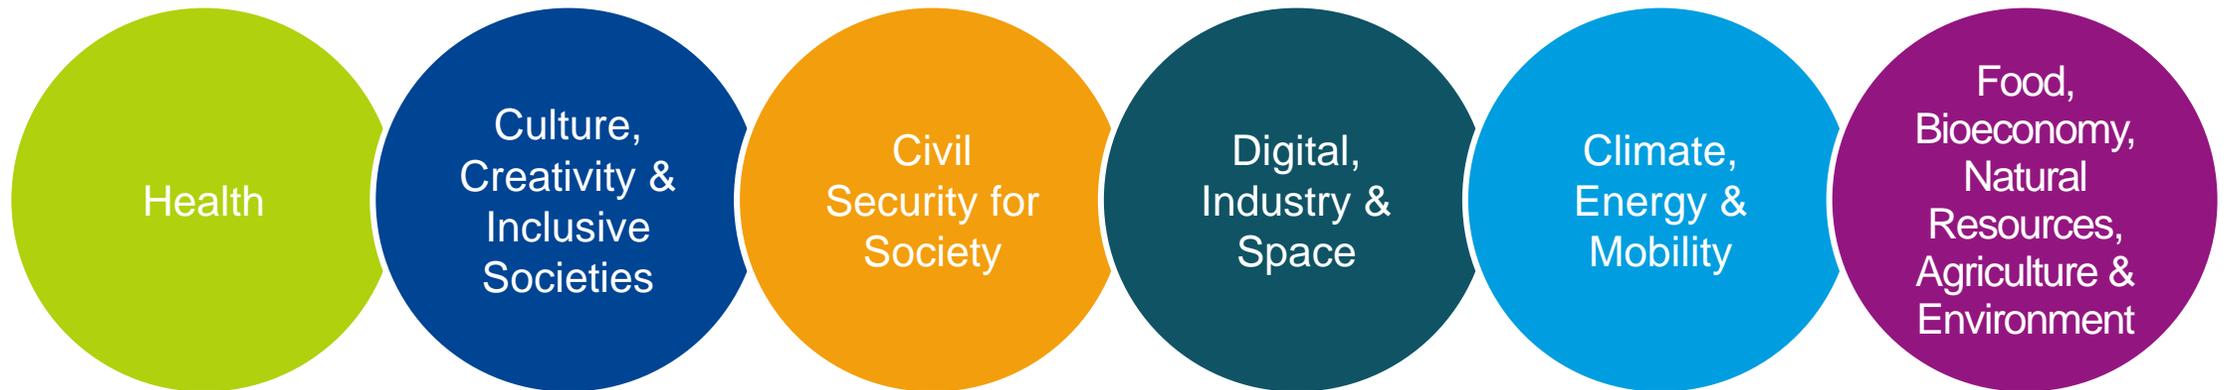

Integrated and inter-connected world-class research infrastructures

€2.4 billion

Pillar II – Clusters

Global Challenges & European Industrial Competitiveness

Boosting **key technologies** and solutions underpinning **EU policies & Sustainable Development Goals**

Collaborative research

Pillar III – Innovative Europe

Overview

Stimulating **market-creating breakthroughs** and **ecosystems** conducive to innovation

European Innovation Council

Support to innovations with **breakthrough and market creating** potential

The budget: **€10.6 billion**, incl. up to **€527 million** for ecosystems (including NGEU – Recovery Fund parts dedicated to EIC).

European innovation ecosystems

Connecting with **regional and national** innovation actors

European Institute of Innovation and Technology (EIT)

Bringing **key actors** (research, education and business) together

circa **€3 billion**

Pillar III – Innovative Europe

European Innovation Council

Innovations with **breakthrough and disruptive** nature and **scale up potential** that are too risky for private investors

One-stop-shop

- 70% of the budget earmarked for SMEs
- Create markets of the future, leverage private finance
- Mostly 'bottom up', but also targeting strategic challenges
- EIC Programme Managers to develop a vision and steer portfolios

PATHFINDER

R&I grants
(from early technology
to proof of concept)

TRANSITION

R&I grants
(proof of concept to
pre-commercial)

ACCELERATOR

Grants & investment for single SMEs &
start-ups
(from pre-commercial to market & scale-up)

Programme Part

Widening Participation & Strengthening the European Research Area (ERA):

Widening Participation and Spreading Excellence

- Teaming, Twinning, ERA Chairs,
- European Cooperation in Science and Technology (COST)
- Boosting National Contact Points' (NCPs) activities, pre-proposal checks and advice
- Brain circulation
- Excellence initiatives:
- Possibility for entities from widening countries to join already selected collaborative R&I actions
- Recognition of participation
- Matchmaking services

€2.96 billion

Reforming and enhancing the EU R&I system

- Strengthening the evidence base for R&I policy
- Foresight
- Support for policy makers to the ERA development
- Support to national R&I policy reform, including Policy Support Facility
- Attractive researcher careers and links with higher education
- Open science, citizen science and science communication
- Gender equality
- Ethics and integrity
- Support to international cooperation
- Scientific input to other policies
- Support to the Programme implementation
- Support for National Contact Points
- Support to dissemination & exploitation

€0.44 billion

Programme part

Hop-on facility for Widening countries

What it is?

It allows research institutions from Widening countries to join **already ongoing R&I actions** under HE Pillar 2 and EIC Pathfinder

- Next deadline – 26 September 2024
- Target – applicants from low R&I performing countries
- Improving inclusiveness
- One additional participant per ongoing project

[HORIZON-WIDERA-](#)
[2023-ACCESS-06](#)

About the Horizon Europe Work Programmes

Horizon Europe is implemented through Work Programmes, which set out the general and specific conditions of calls for proposals.

The 'main' Work Programme covers the following components of Horizon Europe:

- Marie Skłodowska-Curie actions and research infrastructures (Pillar I);
- all clusters (Pillar II);
- the European innovation ecosystems (Pillar III);
- widening participation and spreading excellence, and reforming and enhancing the European R&I system (Widening Participation and Strengthening the European Research Area part).

The 'main' Work Programme for 2023-2024 is made up of 13 parts:

- the introduction;
- 11 parts covering the components mentioned above (including one on missions);
- and the general annexes, which set out rules which apply across the Work Programme such as the standard admissibility conditions and eligibility criteria, selection and award criteria, etc.

About the Horizon Europe Work Programmes

Separate Work Programmes cover:

- the [European Research Council](#) (ERC)
- the [Joint Research Centre](#) (JRC)
- the [European Innovation Council](#) (EIC)

The activities of the EIT are set out in separate programming documents. In addition, a significant part of Pillar II of Horizon Europe will be implemented through institutionalised partnerships, particularly in the areas of Mobility, Energy, Digital and Bio-based economy, which will have their separate Work Programmes.

Horizon Europe is also implemented through the other Specific Programme (the European Defence Fund) and is complemented by the Euratom Research and Training Programme (each having a separate Work Programme).

1) Widening Participation and Strengthening the European Research Area

HORIZON EUROPE - OVERVIEW

Programme Features

Programme features

Non-financial obligations contributing to policy priorities

Deployment and exploitation of innovative solutions to maximise the impact of investments in R&I

Exploitation

Right-to-object

Commission's right to object to a transfer of ownership or exclusive licensing licencing

Mandatory open access to publications

FAIR principles for research data management

Open Science

Gender dimension in R&I content

Sex and/or gender analysis integrated in R&I content and followed through at all stages of the research cycle

Obligation between consortium members to share background information

Granting authority does not obtain ownership of the project results

IPR

Programme features

International cooperation

International Cooperation

Tackling together **global societal challenges** and access to the world's best **talents, expertise and resources**

- Intensified **targeted** actions
- Strengthened support to multilateral cooperation
- Openness to **international participation** balanced with the promotion of EU strategic autonomy

Association to Horizon Europe

- Third countries with good capacity in science, technology and innovation (e.g. UK, New Zealand *for Pillar 2*, Norway, Israel)
- Research security

Programme features

EU Missions

Missions

Relating EU's research and innovation better to **society and citizens' needs**; with strong visibility and **impact**

- **Portfolio of actions across disciplines**
 - research projects,
 - policy measures
 - legislative initiatives
- Bold and measurable goals within a set timeframe
- Specific missions within the Global Challenges and European Industrial Competitiveness Pillar but not limited to

Adaptation to climate change, including societal transformation

Cancer

Healthy oceans, seas, coastal & inland waters

Climate-neutral & smart cities

Soil health & food

Programme features

European partnerships

New generation of **objective-driven** and more ambitious partnerships in support of agreed **EU policies** → bringing private and public partners together, to **avoid the duplication** of investments and contribute to **reducing the fragmentation** of the R&I landscape in the EU

CO-PROGRAMMED

Commission and industry to boost investments in research and innovation targeting the goals of **green** and **digital** transition

CO-FUNDED

Co-fund actions, where research funders and other public authorities at the core of the consortium

INSTITUTIONALISED

JOINT UNDERTAKINGS,
e.g.

- EuroHPC
- Clean Hydrogen
- Europe's Rail
- Global Health EDCTP3
- Innovative Health Initiative

Programme features

Key Impact Pathways

1. Creating high-quality new knowledge
2. Strengthening human capital in R&I
3. Fostering diffusion of knowledge and Open Science

Scientific Impact

4. Addressing EU policy priorities & global challenges through R&I
5. Delivering benefits & impact via R&I missions
6. Strengthening the uptake of R&I in society

Societal Impact

7. Generating innovation-based growth
8. Creating more and better jobs
9. Leveraging investments in R&I

Economic Impact

Policy makers and the public get regular insights on the effects and benefits of the programme for **European science**, the **economy** and **wider society**, based on a holistic approach for capturing and communicating impact.

2. Participant register

Participant Identification Code (PIC)

Participant Register

Need help?

- Key steps
- Reference documents
- Participant register**
- Partner search

The participant register is now multilingual!

top right corner of the Portal.

If you want to participate in a call for proposals or in a call for tenders with eSubmission, your organisation needs to be registered and have a 9-digit Participant Identification Code (PIC). Please quote your PIC in all correspondence with the Commission.
The register contains all participants of EU programmes.

Is your organisation already registered? PIC search

Please check whether your organisation has already been registered. If so, no need to register it again.

Search a PIC

Register your organisation

To register your organisation or as a natural person, you need to login into the Portal or, if you are a new user, create your account.

Check what information you need to register in the Online Manual - and keep it to hand during the registration procedure. To start registration, click on the button below.

Register your organisation

You can suspend the registration process at any time: the data entered can be saved as draft and you can continue your registration later. To return to your registration, please log in and get into My Organisation(s) in the My Area section. Incomplete, draft registrations are automatically deleted after one year.

Additionally, for actions where the SME status is an eligibility criterion (like, e.g. the SME Instrument) you must also carry out the SME self-assessment.

Should your project or tender be successfully evaluated, the registered data will be verified by the Validation Service team before the signature of the Grant Agreement or of the Framework Contract.

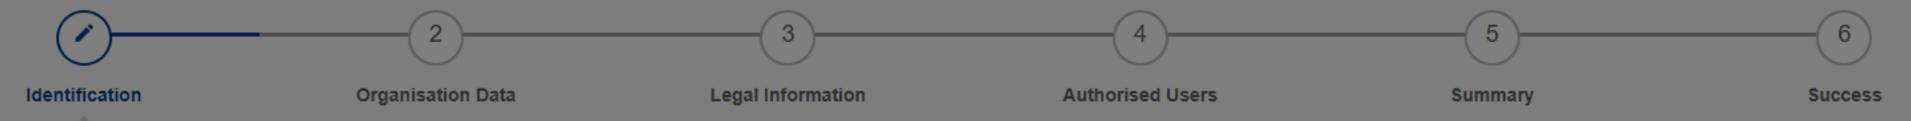

Make sure your organisation doesn't have a PIC already

If not, you can start registering

-  MY PERSON PROFILE
-  MY ORGANISATION(S)
- GRANTS 
 -  My Proposal(s)
 -  My Project(s)

Welcome to the Participant Register

The Registration wizard will guide you through the registration process.

Please have the relevant documents at hand, to make sure you fill in everything correctly.

Registration will take 5-10 minutes. The system will automatically save your information if in case you need to close the wizard. Your data will be restored the next time when you re-enter the page.

Your/organisation PIC number will be displayed at the end, when registration is completed. PIC: Participant Identification Code

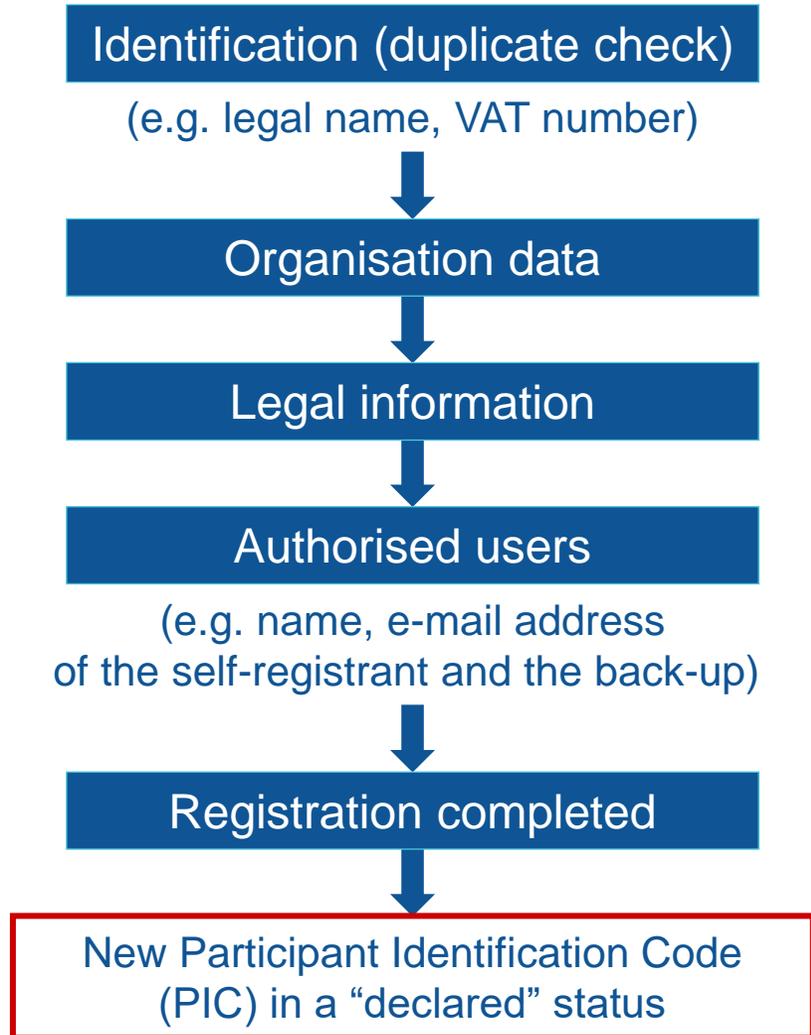

[OK](#)

[Save](#)

[Review the Form](#)

[Next](#)

How to register your organization in the Participant Register

The screenshot shows the 'Participant's Register' interface. At the top, there is a progress bar with six steps: 1. Identification (active), 2. Organisation Data, 3. Legal Information, 4. Authorised Users, 5. Summary, and 6. Success. A 'Need help?' button is in the top right corner.

The 'Identification' section contains the following fields:

- Legal name * (240 characters)
- Registration country * (dropdown menu)
- Registration number (50 characters)
- VAT number * (20 characters) with a toggle switch labeled 'not applicable'
- Website (500 characters)

At the bottom, there are two buttons: 'Review the Form' (red) and 'Next' (blue).

How to register your organization in the Participant Register

To submit your proposal, you don't need a validated PIC. If your proposal is successful, your PIC will be validated by REA Central Validation Services.

Validation takes about 3 weeks (unless of specific complex cases). Please be responsive and provide the requested documents/clarifications within the shortest delay to allow for a smooth and quick grant signature.

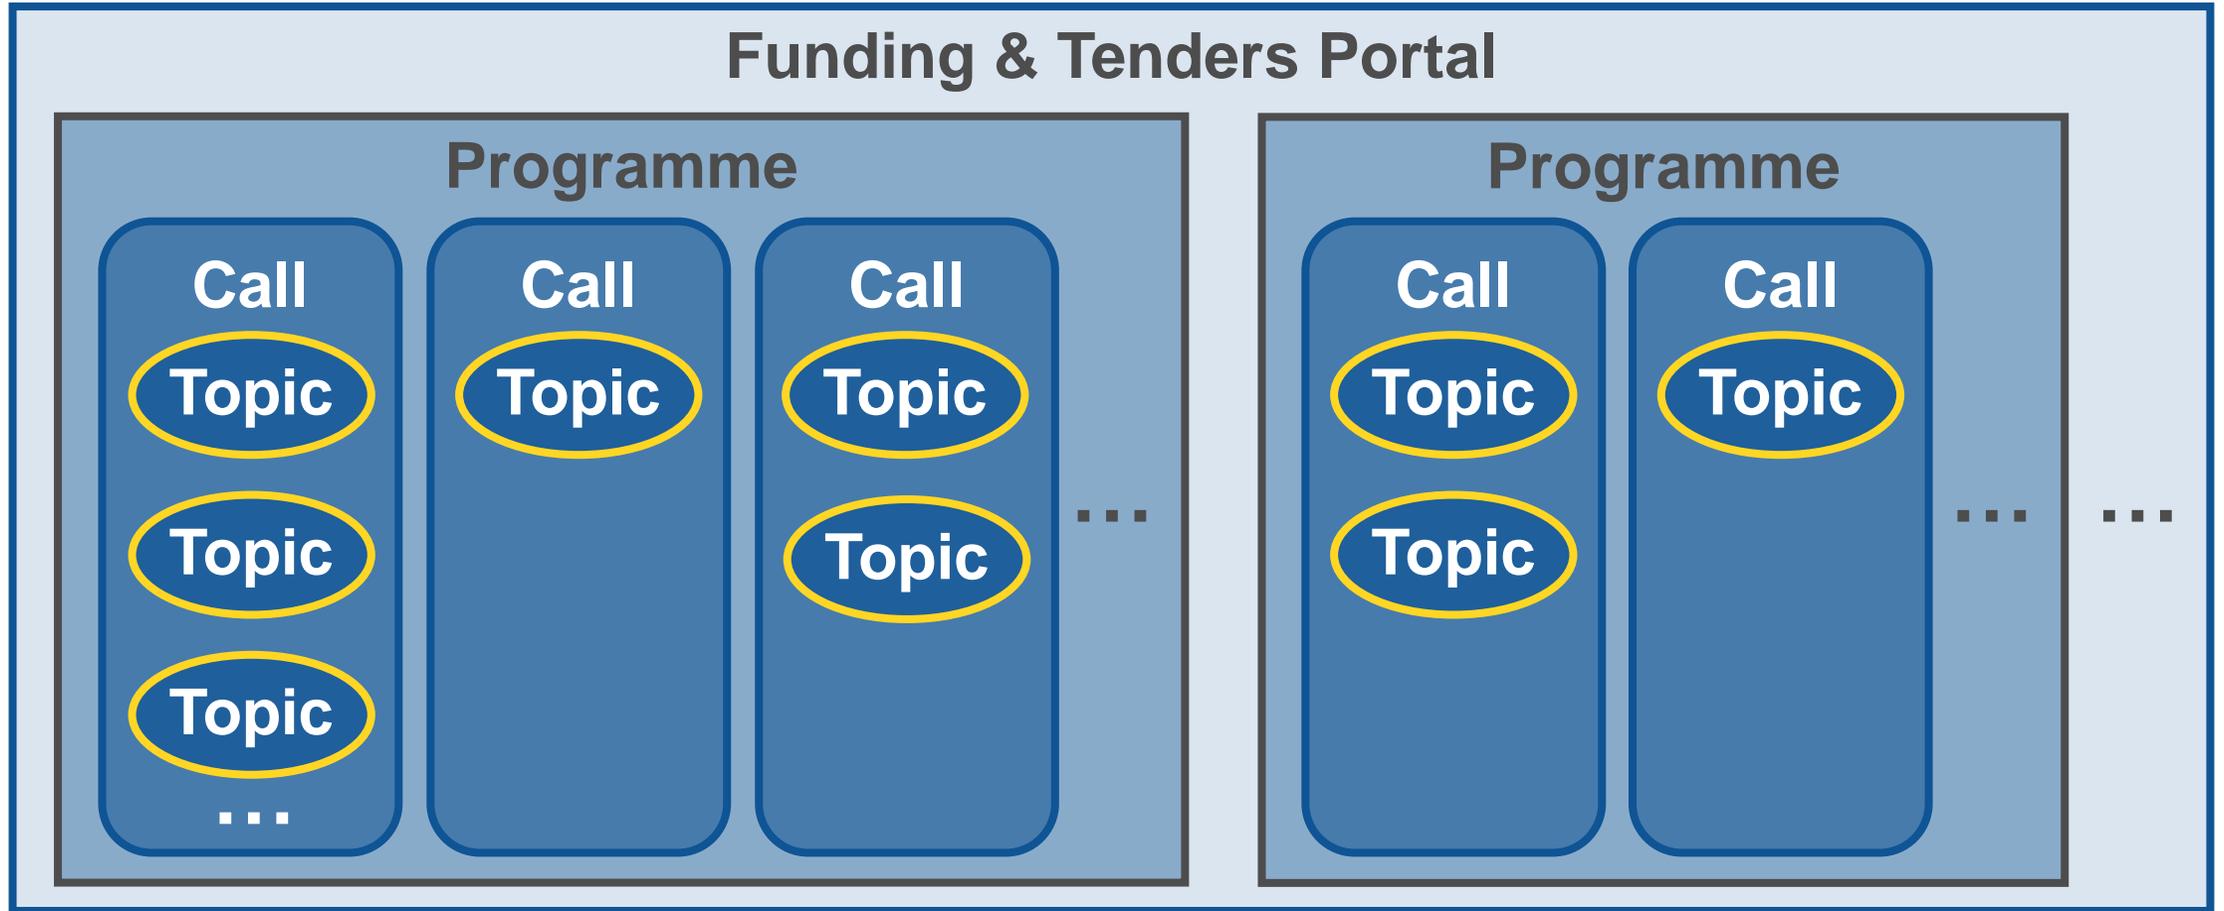

Your Legal Entity Appointed Representative (LEAR) must be validated too.

All the details about registration and validation are available [online](#)

Topic description

ExpectedOutcome:
Projects are expected to develop further the harvesting of renewable energy in areas/conditions where other conversion systems are less efficient, less convenient or not possible.
The results are expected to contribute to at least three of the outcomes in A and B:...

[Show more](#)

Topic destination

Sustainable, secure and competitive energy supply (2023/24)

This Destination includes activities targeting a sustainable, secure and competitive energy supply. In line with the scope of cluster 5, this includes activities in the areas of renewable energy; energy system, grids and storage; as well as Carbon Capture, Utilisation and Storage (CCUS).

The transition of the energy system will rely on reducing the overall energy demand and making the energy supply side climate neutral, in current and future climate conditions. R&I actions will help to make the energy supply side cleaner, more secure...

Topic related FAQ

2 item(s) found

Search...

Under topic HORIZON-CL5-2023-D3-03-01, are the results expected to contribute and cover at least three technologies from A or B only, or three technologies from A and B together?

The topic's text specifies: "The results are expected to contribute to at least three of the outcomes in A and B", i.e. at least 1A & 2B or 2A & 1B.

Which and how many outcomes should be the focus of the research project?

The text specifies: "The results are expected to contribute to at least three of the outcomes in A and B", thus outcomes should address at least 1A & 2B or 2A & 1B.

 In this step you can edit the Administrative Forms and upload the proposal and its annexes. You may return to this step from the 'My Proposals' section of the Funding & Tenders Portal.

Submit your proposal as early in the process as possible - you can update and resubmit an improved version many times before the call closure.

Submitting a proposal will overwrite any previous versions of this same proposal - this process is irreversible.

Any changes made to the proposal will not be available to the European Commission service unless resubmitted before the call closure.

 Your proposal contains changes that have not yet been submitted.

Discover the funding & tenders opportunities

Find out how to participate by following these key steps.

Find calls for proposals

Explore the available EU funding opportunities by searching for Calls for Proposals within your topics of interest and find partners to submit a proposal.

Find calls for tenders

Find business opportunities in the calls for tenders managed by EU institutions, bodies and agencies.

View projects and results

Browse through EU funded projects and learn about the results. Invest in opportunities and get inspired by the highlights and success stories.

Work as an expert

Proposals and projects need evaluations, monitoring and domain-knowledge advice from experts.

Enhanced findability of information about opportunities

Highlights

Horizon results platform

The Official Journal of the European Union, EU case law and other resources for EU law

How to participate

Catalogue of datasets from the EU institutions and other bodies

Guidance and documents

Reports, studies, information booklets, magazines and other publications from the EU institutions and other bodies

EU programmes involved

Discover the range of EU Programmes, a wide variety of EU funding opportunities implemented through the 2021-2027 multiannual financial framework, divided by heading and cluster. Access specific EU funding Programme's information, from reference documents to eligibility criteria and guidelines for participants or projects and results.

EU programmes

Calls for proposals

Calls for proposals

Calls for proposals are funding opportunities issued by the European Union institutions, agencies and bodies. These are direct financial contributions, known as grants, that are awarded to third-party beneficiaries (e.g., research organisations, public entities, non-governmental organisations, and private companies) to engage in activities that serve EU policies.

HORIZON EUROPE – HOW TO WRITE A GOOD
PROPOSAL

The call for proposal and the evaluation process

Step 1: Get familiar with the essential documents

These will help you to understand and meet the call conditions; comprehend what is expected from you in terms of activities and how your project can contribute to the achievement of the Union's objectives, priorities and international commitments; identify which costs can be reimbursed.

Available on the [F&T Portal](#) and [R&I webpage](#)

Step 2: Get familiar with the call for proposals

Work programmes set out funding opportunities through calls for proposals, mainly. A call contains more topics which address specific needs.

The standard structure of a call is:

- i. Introduction: setting the scene for the specific call, state of art, expected contribution to policy objectives, challenges ahead.
- ii. **Destination(s)**: calls are grouped under destinations, wider long-term effects on society (including the environment), the economy and science, enabled by the outcomes of R&I investments (long term). It refers to the specific contribution of the project to the work programme[...]
- iii. **Call(s)**: all calls belonging to the same destination share a common identifier in the call string (INFRADEV, DEMOCRACY, DATA, etc.). Each call indicates the available budget and deadlines.
- iv. **Topic(s)**: details the eligible activities, expected outcomes, specific conditions, etc. Describes the outcomes which are critical to the achievement of the expected impact of the destination.

General information		
Programme Horizon Europe Framework Programme (HORIZON)		€ Budget overview
Call Next generation of scientific instrumentation, tools, methods, and advanced digital solutions for RIs (2024) (HORIZON-INFRA-2024-TECH-01)		
Type of action HORIZON-RIA HORIZON Research and Innovation Actions	Type of MGA HORIZON Action Grant Budget-Based [HORIZON-AG]	Open for submission
Deadline model single-stage	Opening date 06 December 2023	Deadline date 12 March 2024 17:00:00 Brussels time

The Research Infrastructures work programme is structured around the following five destinations:

- **Destination - Developing, consolidating and optimising the European research infrastructures landscape, maintaining global leadership (INFRADEV)**, to contribute to a strong, excellent and impactful European Research Area, by reinforcing RI capacities in Europe, their role at the global level and the policy-making in this field;
- **Destination - Enabling an operational, open and FAIR EOSC ecosystem (INFRAEOSC)**, aiming at delivering a “Web of FAIR Data and Services” for Science: a

The following call(s) in this work programme contribute to this destination:

Call	Budgets (EUR million)		Deadline(s)
	2023	2024	
HORIZON-INFRA-2023-DEV-01	79.55	18.00	09 Mar 2023
HORIZON-INFRA-2024-DEV-01		23.00	12 Mar 2024
Overall indicative budget	79.55	41.00	

Step 2: Get familiar with the call for proposals

Once you have identified the call for proposals you are interested in, analyse the **topic**, highlight important elements/keywords and assess the relevance of your project idea against the topic conditions.

Specific conditions table:

- **Type of action** replies to the question: which activities are eligible?
- **Eligibility conditions**: the general conditions are published in the WP. In this section you can find specific exceptions or additional conditions applying to the topic
- **Expected EU contribution per project**: estimation of the EU contribution per project (i.e. costs might be higher)
- **Technology readiness level**: if relevant. It defines the maturity of a product and its relation to the market.

<i>Technology Readiness Level</i>	Activities are expected to start at TRL 2 and achieve TRL 5 by the end of the project – see General Annex B
-----------------------------------	---

HORIZON-INFRA-2024-TECH-01-01: R&D for the next generation of scientific instrumentation, tools, methods, solutions for RI upgrade

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of between EUR 5.00 and 10.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 63.50 million.
<i>Type of Action</i>	Research and Innovation Actions
<i>Eligibility conditions</i>	The conditions are described in General Annex B. The following exceptions apply: The following additional eligibility criteria apply: due to the specific
	nature of this topic, consortia must include at least 3 different research infrastructures, each of them being an ESFRI infrastructure ⁹³ , and/or a European Research Infrastructures Consortium ⁹⁴ (ERIC) or another research infrastructure that is an intergovernmental organisation of European interest. Such research infrastructures, and the beneficiaries that own/operate them, must be explicitly identified in the proposals. The specific conditions for actions with PCP/PPI procurements in section H of the General Annexes apply to grants funded under this topic.

Step 2: Get familiar with the call for proposals

Each topic defines:

- **the expected outcome:** the expected effects, over the medium term, of projects supported under a given topic. The results of a project should contribute to these outcomes, fostered in particular by the dissemination and exploitation measures [...]. Outcomes generally occur during or shortly after the end of the project. In this section you can find useful hints about the target audiences, suggestions about actors that should be involved in your project or benefit from it.
- **the scope:** describes the aim of the topic, which are the current gaps and needs to be addressed. Here you can find additional indications on what it is expected from your project.

Expected Outcome: Project results are expected to contribute to several of the following expected outcomes:

- enhanced scientific competitiveness of European research infrastructures;
- enhanced RI capacities to address research challenges and EU policy priorities;
- foundations for the development of innovative companies;
- increased collaboration of research infrastructures with universities, research organisations and industry;
- increase of the technological level of industries through the co-development of advanced technologies for research infrastructures and creation of potential new markets;
- integration of research infrastructures into local, regional and global innovation systems and promotion of entrepreneurial culture.

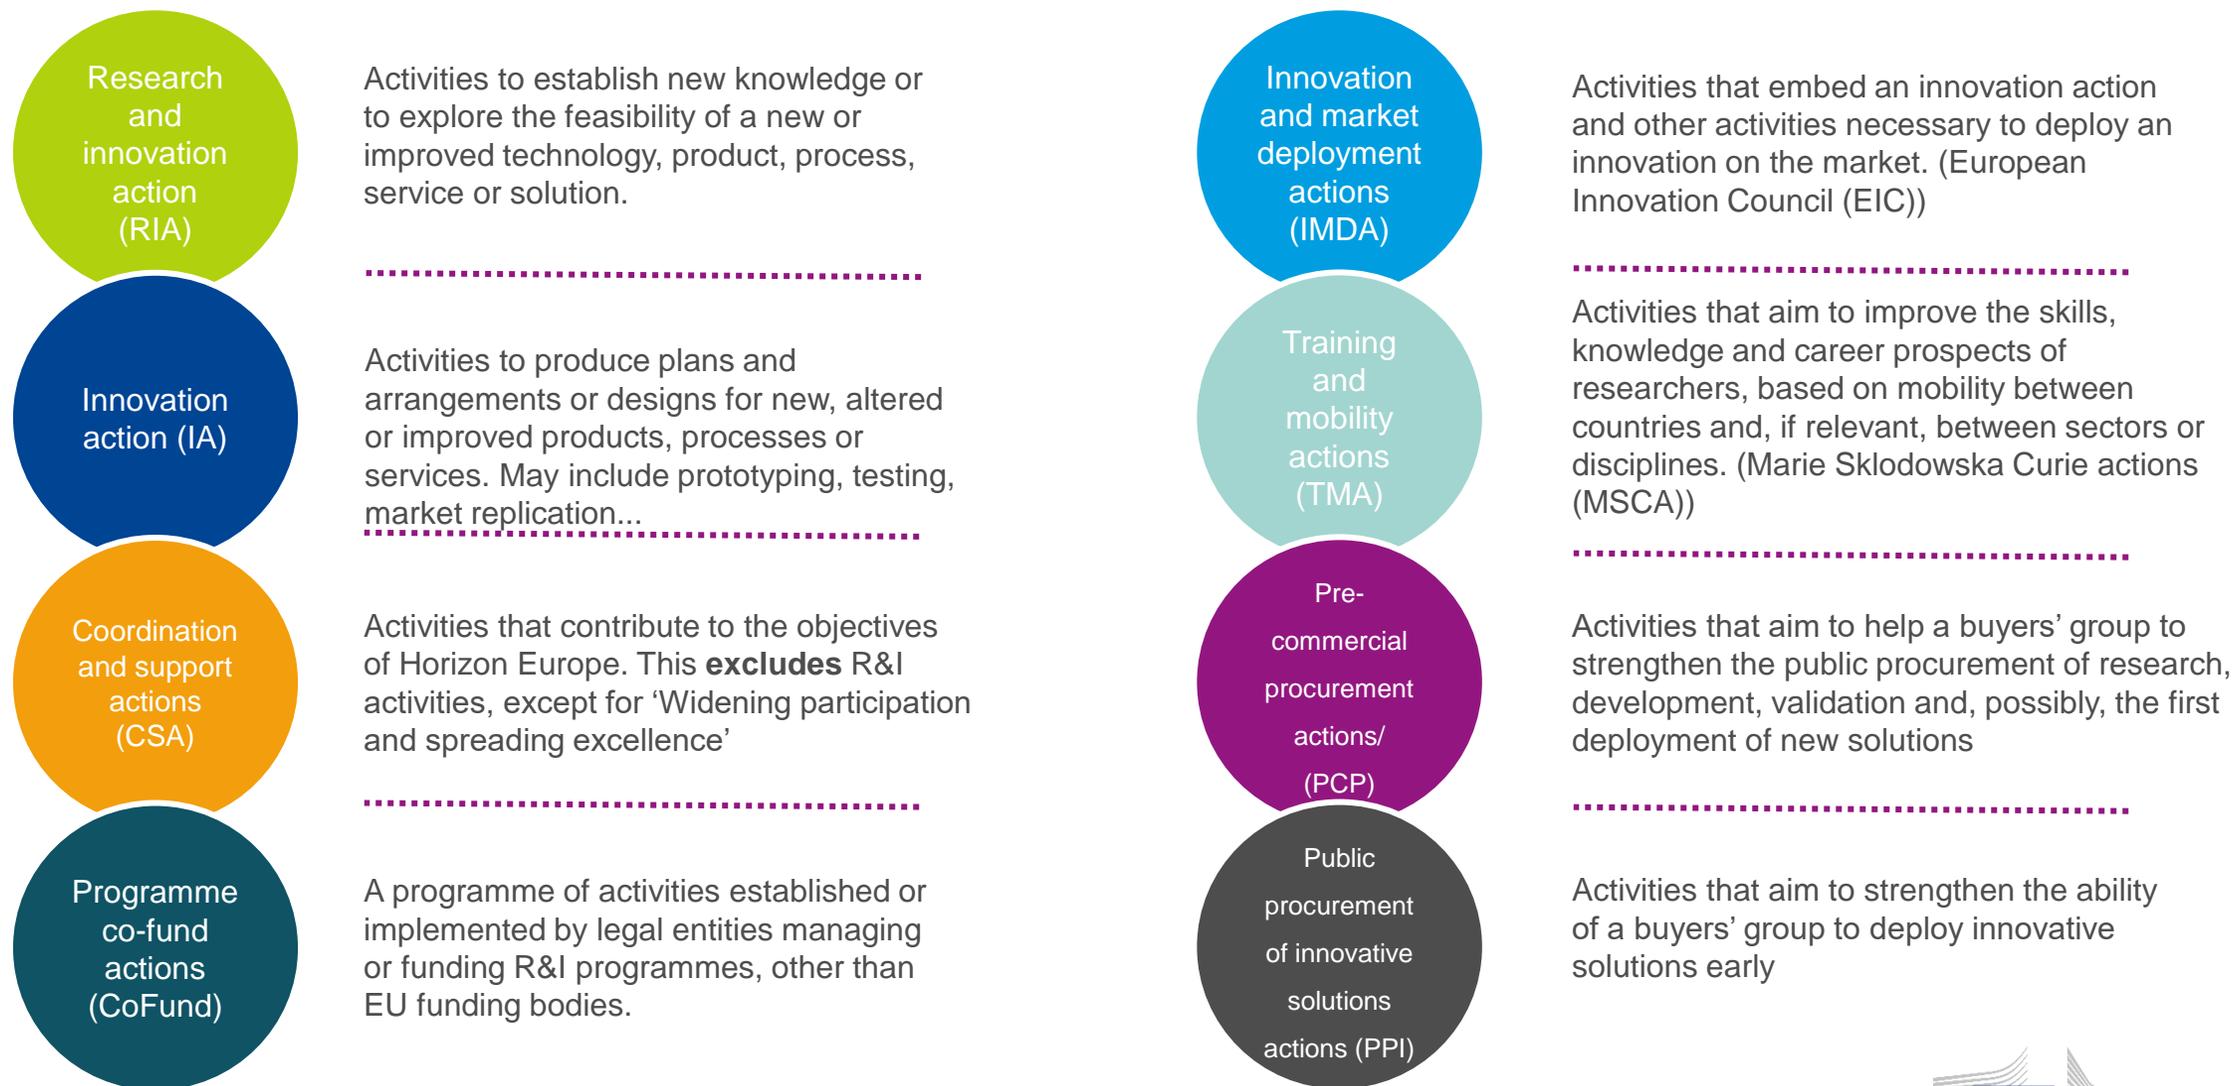

Scope: The aim of this topic is to deliver innovative scientific instrumentation, tools, methods and solutions which advance the state-of-art of RIs in the EU and Associated Countries, and show transformative potential in RIs operation. The related developments, which underpin the provision of improved and advanced services, should lead research infrastructures to support new areas of research and/or a wider community of users, including industrial users.

Cutting-edge technologies will also enhance the potential of RIs to contribute addressing EU policy objectives and socio-economic challenges.

Proposals should ensure complementarity with actions funded under the previous 2022 call (topic HORIZON-INFRA-2022-TECH-01-01 in the 2021-2022 work programme), targeting different instrumentation, tools, methods and solutions.

Proposals should address the following aspects, as relevant:

Activities eligible for funding – Type of actions

Full description in the [General Annexes point B](#)

Maximum funding rates per type of action

Type of Action	Funding rate
Research and innovation action	100%
Innovation action	70% (except for non-profit legal entities, where a rate of up to 100% applies)
Coordination and support action	100%
Programme co-fund action	Between 30% and 70%
Innovation and market deployment	70% (except for non-profit legal entities, where a rate of up to 100% applies)
Training and mobility action	100%
Pre-commercial procurement action	100%
Public procurement of innovative solutions action	50%

Other funding rates may be set out in the specific call conditions

Step 3: Get familiar with the evaluation process

Step 3: Get familiar with the evaluation process

Some general tips

- Check standard evaluation forms (for each type of action) in the Funding & Tenders Portal and in the Documents section of the topic page
- Some of the specific conditions in the topic may be reflected in changes to the standard evaluation criteria (unusual, but possible)
- Get familiar with the evaluation procedure and ranking – information is included in the General Annexes of the work programme ([sections D and F](#)). Standard procedure:
 - Submission: single-stage or a two-stage submission procedure.
 - Evaluation: one (standard) or several steps (e.g. interviews)
 - Evaluation committee composed solely of independent external experts
 - Scores and weighting: each criterion is scored out of 5. The threshold for each criterion is 3. The overall threshold, applying to the sum of the three individual scores, is 10/15
 - Criteria to rank proposal with the same score (standard criteria set out in the General Annexes if not provided by the specific call conditions)

Helpful supporting material:

- Horizon Implementation Day: Finding opportunities and submitting a proposal in Horizon Europe (5 October 2023) [Event page](#)
- [Standard briefing slides for HE evaluators](#) 

Example of standard evaluation criteria (for RIAs and IAs)

EXCELLENCE

- ✓ Clarity and pertinence of the **project's objectives**, and the extent to which the proposed work is ambitious, and goes beyond the state-of-the-art.
- ✓ Soundness of the proposed **methodology**, including the underlying concepts, models, assumptions, interdisciplinary approaches, appropriate consideration of the **gender dimension** in research and innovation content, and the quality of **open science practices** including sharing and management of research outputs and engagement of citizens, civil society and end users where appropriate.

IMPACT

- ✓ Credibility of the **pathways** to achieve the expected **outcomes and impacts** specified in the work programme, and the likely scale and significance of the contributions due to the project.
- ✓ Suitability and quality of the **measures to maximize expected outcomes and impacts**, as set out in the dissemination and exploitation plan, including communication activities.

QUALITY AND EFFICIENCY OF THE IMPLEMENTATION

- ✓ Quality and effectiveness of the **work plan**, assessment of risks, and appropriateness of the effort assigned to work packages, and the resources overall.
- ✓ Capacity and role of each **participant**, and extent to which the **consortium** as a whole brings together the necessary expertise.

Proposals aspects are assessed to the extent that the proposed work is within the scope of the work programme topic

Proposals with identical scores

For each group of proposals with the same score, starting with the group achieving the highest score and continuing in descending order:

1. Proposals that address **aspects of the call that have not otherwise been covered** by more highly ranked proposals will be considered to have the highest priority.
2. The proposals identified under 1), if any, will themselves be prioritised according to the **scores** they have been awarded for 'Excellence'. When these scores are equal, priority will be based on scores for 'Impact'. In the case of 'Innovation actions', priority will be given to the score for 'Impact', followed by that for 'Excellence'.
3. If necessary, the **gender balance** among the personnel named in the proposal who will be primarily responsible for carrying out the research and/or innovation activities, and who are included in the researchers table in the proposal, will be used as a factor for prioritisation.
4. If necessary, any further prioritisation will be based on **geographical diversity**, defined as the number of Member States or Associated Countries represented in the proposal, not otherwise receiving funds from projects higher up the ranking list (and if equal in number, then by budget).
5. If a distinction still cannot be made, the panel may decide to further prioritise by considering **other factors** related to the objectives of the call, or to Horizon Europe in general. These may include, for example, enhancing the quality of the project portfolio through synergies between projects or, where relevant and feasible, involving SMEs.

Step 4: Get familiar with the standard proposal templates

Standard templates per type of action are available in the Funding & Tenders Portal. Familiarising with the standard template before starting your work, may help you in the organisation of the preparatory work.

IMPORTANT: The template that you need to use for each specific topic is the one you download from the submission tool

The proposal contains two parts:

- **Part A** (web-based forms) is generated by the IT system. It is based on the information entered by the participants through the submission system in the Funding & Tenders Portal.
- **Part B** is the narrative part that includes three sections each corresponding to an evaluation criterion (Excellence, Impact, Implementation). Part B must be uploaded as a PDF document using the template downloaded by the applicants in the submission system for the specific call or topic.

Horizon Europe Programme

Standard Application Form (HE RIA, IA)

Application form (Part A)
Project proposal – Technical description (Part B)

Version 7.0
27 September 2023

Application form – Part A (web-based forms)

- **General information on the proposal:** title, acronym, abstract, duration, keywords (based on the topic)
- **Participants:** organization's details are filled-in automatically using data retrieved from the participant registry. Enter contact persons' details, identify researchers involved in the proposal, choose the role of each participant, list participants' previous project and activities related to the call, complete the declaration of gender equality plan.
- **Budget of the proposal**
- **Ethics and security** questionnaires and self-assessment
- **Other questions** depending on the call (e.g. clinical trials, second stage proposals, etc.)
- **Declarations** signed by project coordinator on behalf of the consortium

Application form – Part B (PDF)

- The template includes extensive **instructions**, and its structure follows the **evaluation criteria**
- It is normally subject to **page limits**. Actual page limit applicable are clearly announced in the topic text. Page limits are applied automatically:

If you attempt to upload a proposal longer than the specified limit before the deadline, you will receive an automatic warning and will be advised to shorten and re-upload the proposal. After the deadline, excess pages (in over-long proposals) will be automatically made invisible and will not be taken into consideration by the evaluators.

For the Research & Innovation Action (RIA) and the Innovation Action (IA), the length can be at most 45 pages. For the Coordination and Support Action (CSA), the limit is 30 pages. For a first-stage application, it is at most 10 pages. For lump sum calls, the limit is 50 pages for RIA/IAs and 33 pages for CSAs.

HORIZON EUROPE – HOW TO WRITE A GOOD PROPOSAL

Tips & tricks

General recommendations

- To demonstrate the quality of **the technical and scientific aspects** is very important, but so it is to demonstrate the **impact** and the **quality of the implementation**.
- Pay sufficient attention to the relevant **policy aspects** (some must be taken into consideration in all topics in Horizon Europe)
- Build up a credible and balanced **budget**, aligned with planned activities
- Show how the **dissemination and exploitation plan** (draft version in the proposal!!) will promote and foster the achievement of the expected impact
- Follow guidance and examples available in the proposal template

2.2 Measures to maximise impact - **Dissemination, exploitation and communication** #@COM-DIS-VIS-CDV@# [e.g. 5 pages, including section 2.3]

- Describe the planned measures to maximise the impact of your project by providing a first version of your 'plan for the **dissemination and exploitation including communication activities**'. Describe the **dissemination**, exploitation and communication measures that are planned, and the target group(s) addressed (e.g. scientific community, end users, financial actors, public at large).
 - ⚠ *Please remember that this plan is an admissibility condition, unless the work programme topic explicitly states otherwise. In case your proposal is selected for funding, a more detailed 'plan for **dissemination** and exploitation including communication activities' will need to be provided as a mandatory project deliverable within 6 months after signature date. This plan shall be periodically updated in alignment with the project's progress.*
 - ⚠ ***Communication**¹ measures should promote the project throughout the full lifespan of the project. The aim is to inform and reach out to society and show the activities performed, and the use and the benefits the project will have for citizens. Activities must be strategically planned, with clear objectives, start at the outset and continue through the lifetime of the project. The description of the communication activities needs to state the main messages as well as the tools and channels that will be used to reach out to each of the chosen target groups.*
 - ⚠ *All measures should be proportionate to the scale of the project, and should contain concrete actions to be implemented both during and after the end of the project, e.g. standardisation activities. Your plan should give due consideration to the possible follow-up of your project, once it is finished. In the justification, explain why each measure chosen is best suited to reach the target group addressed. Where relevant, and for innovation actions, in particular, describe the measures for a plausible path to commercialise the innovations.*
 - ⚠ *If exploitation is expected primarily in non-associated third countries, justify by explaining how that exploitation is still in the Union's interest.*
 - ⚠ *Describe possible feedback to policy measures generated by the project that will contribute to designing, monitoring, reviewing and rectifying (if necessary) existing policy and programmatic measures or shaping and supporting the implementation of new policy initiatives and decisions.*

Key principles to write a proposal

Your proposed work must be within the scope of a work programme topic

You need to demonstrate that your idea is ambitious and goes beyond the state of the art

Your scientific methodology must take into account interdisciplinary, gender dimension and open science practices.

You should show how your project could contribute to the outcomes and impacts described in the work programme (the pathway to impact)

You should describe the planned measures to maximise the impact of your project ('plan for the dissemination and exploitation including communication activities')

You should demonstrate the accuracy of your work plan and planned resources

Policy and horizontal considerations

Open Science across the programme

Gender dimension in R&I content

Pathway to impact

Measures to maximise impact

Artificial intelligence

These aspects must normally be considered in all Horizon Europe calls (unless explicitly mentioned in the topic description).

Specific calls may include other aspects to take into account.

Check guidance and recorded webinars:

- [Horizon Europe Programme Guide](#)
- Horizon Implementation Day: Finding opportunities and submitting a proposal in Horizon Europe (5 October 2023). [Event page](#)
- Horizon Implementation Day: Grant management (24 October 2023). [Event page](#)

The excellence criterion (1/2)

Focus on the **project's objectives**:

- Are they clear and pertinent to the topic?
- Are they measurable and verifiable?
- Are they realistically achievable?
- Is the proposed work ambitious and goes beyond the state-of-the-art?
- Does the proposal include ground-breaking R&I, novel concepts and approaches, new products, services or business and organisational models?
- Is the R&I maturity of the proposed work in line with the topic description?

Please bear in mind that advances beyond the state of the art must be interpreted in the light of the positioning of the project. For example, expectations will not be the same for RIAs at lower TRL, compared with Innovation Actions at high TRLs.

The excellence criterion (2/2)

Focus on the **scientific methodology**:

- Is the scientific methodology (i.e. the concepts, models and assumptions that underpin the work) clear and sound?
- Is it clear how expertise and methods from different disciplines will be brought together and integrated in pursuit of the objectives? if applicants justify that an inter-disciplinary approach is unnecessary, is it credible?
- Has the gender dimension in research and innovation content been properly taken into account?
- Are open science practices implemented as an integral part of the proposed methodology?
- Is the research data management properly addressed?
- For topics indicating the need for the integration of social sciences and humanities, is the role of these disciplines properly addressed?

The impact criterion (1/2)

Focus on the proposed **pathways towards impact**:

- Is the contribution of the project towards the 1) expected outcomes of the topic and 2) the wider impacts, in the longer term, as specified in the respective destinations of the Horizon Europe Work Programme, credible?
- Are potential barriers to the expected outcomes and impacts identified (i.e. other R&I work within and beyond Horizon Europe; regulatory environment; targeted markets; user behavior), and mitigation measures proposed? Is any potential negative environmental outcome or impact (including when expected results are brought at scale, such as at commercial level) identified? Is the management of the potential harm properly described?
- Are the scale and significance of the project's contribution to the expected outcomes and impacts estimated and quantified (including baselines, benchmarks and assumptions used for those estimates)?
 - Scale' refers to how widespread the outcomes and impacts are likely to be. For example, in terms of the size of the target group, or the proportion of that group, that should benefit over time;
 - 'Significance' refers to the importance, or value, of those benefits. For example, number of additional healthy life years; efficiency savings in energy supply.

The impact criterion (2/2)

Focus on the **measures to maximise impact** - Dissemination, exploitation and communication :

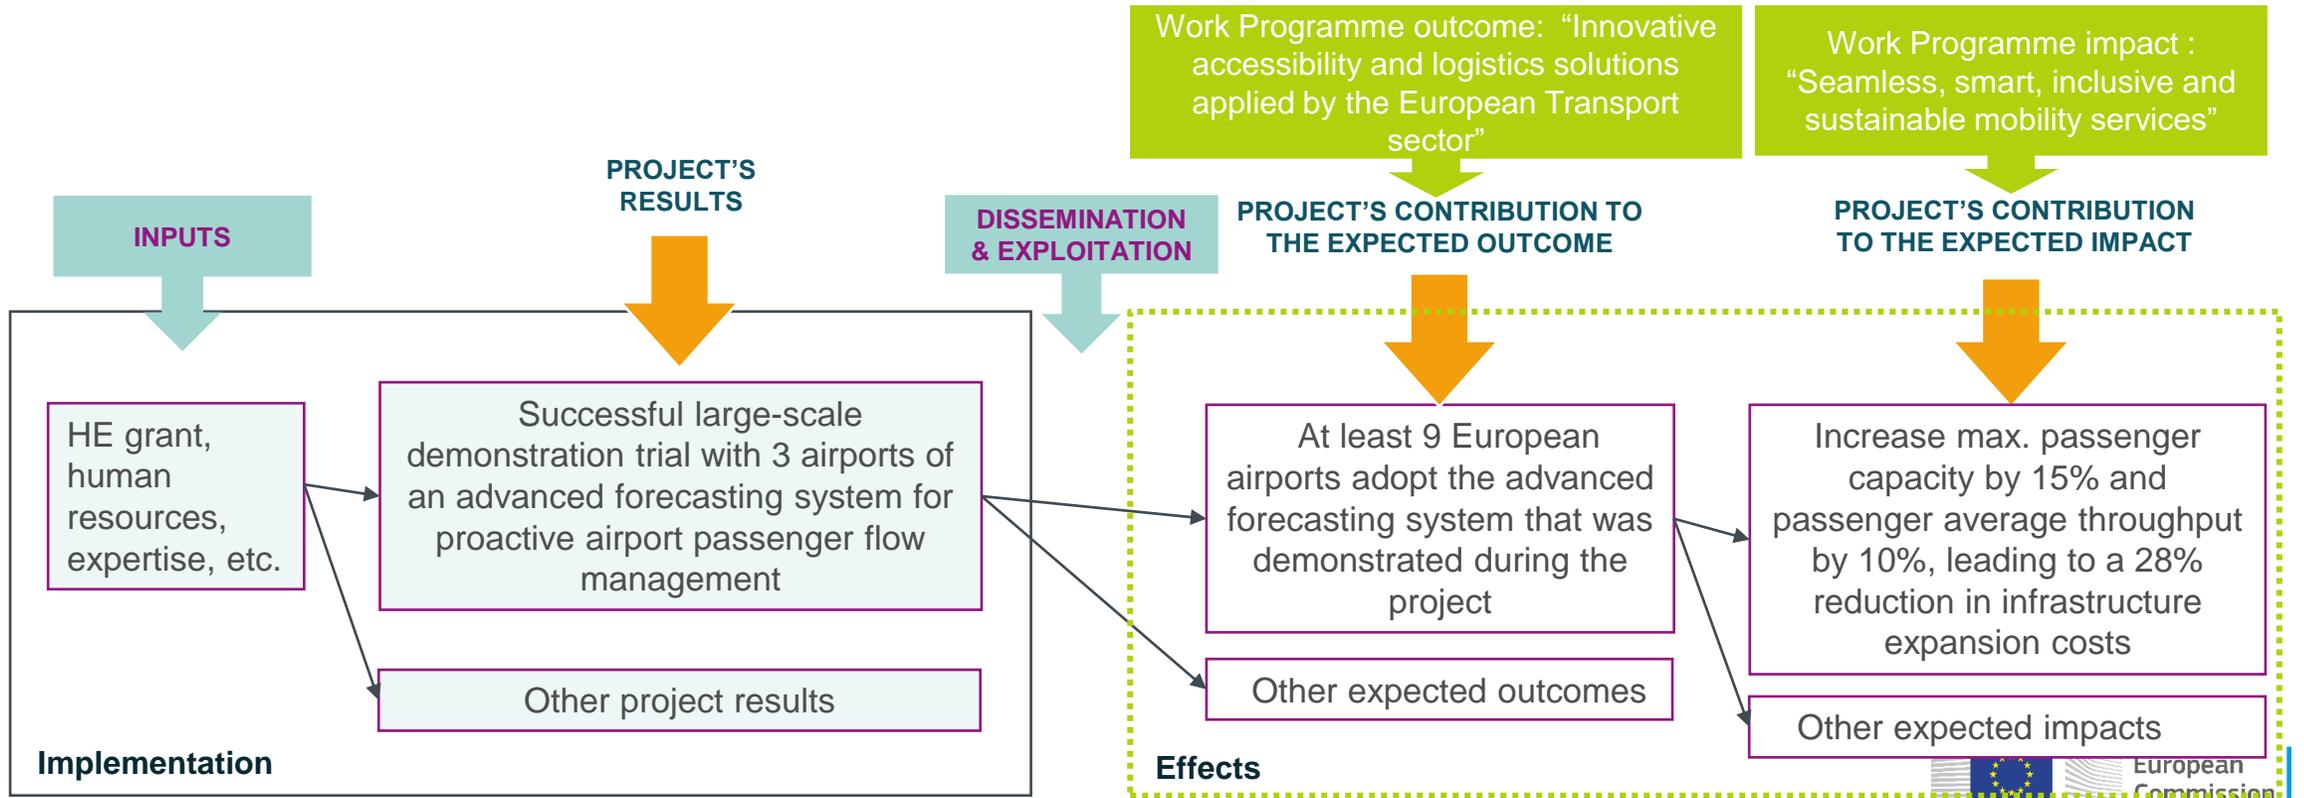

- Are the proposed dissemination, exploitation and communication measures suitable for the project and of good quality? All measures should be proportionate to the scale of the project and should contain concrete actions to be implemented both during and after the end of the project.
- Are the target groups (e.g. scientific community, end users, financial actors, public at large) for these measures identified?
- Is the strategy for the management of intellectual property properly outlined and suitable to support exploitation of results?
 - If exploitation is expected primarily in non-associated third countries, is it properly justified how that exploitation is still in the Union's interest?

Describing the impact of your proposal

Project's pathway towards impact

...think about the specific contribution the project can make to the expected outcomes and impacts set out in the Work Programme

The Quality of implementation (1/2)

Design the **work plan in a clear manner**, showing the logical structure and describing the timeline.

- Is the work plan of good quality and effective?
- Does it include quantified information so that progress can be monitored?
- Is the number of work packages commensurate to the scale of the project?
- Are critical risks, relating to project implementation, identified and proper risk mitigation measures proposed?

Build an accurate **budget**, describe the **resources** available and justify additional resources needed for the implementation of the project.

The Quality of implementation (2/2)

Focus on the **quality of participants and the consortium** as a whole:

- Does the consortium match the project's objectives and bring together the necessary disciplinary and inter-disciplinary knowledge?
- Does the consortium include expertise in open science practices, and gender aspects of R&I, as appropriate?
- For topics flagged as 'Social sciences and humanities' (SSH) relevant, does the consortium include expertise in social sciences and humanities?
- Do the partners have access to critical infrastructure needed to carry out the project activities?
- Are the participants complementing one another (and cover the value chain, where appropriate)?
- In what way does each of them contribute to the project? Does each of them have a valid role, and adequate resources in the project to fulfil that role (so they have sufficient operational capacity)?
- Is there industrial/commercial involvement in the project to ensure exploitation of the results?

Participants' previous publications, in particular journal articles, are expected to be open access and existing datasets FAIR and 'as open as possible, as closed as necessary'.

Recap – Dos and Don'ts

- Know what was funded in the past to demonstrate the added value of your project, show complementarity and synergies, but also how you will be able to go a step beyond, show you are aware about the funding landscape
- Be precise in the selection of the keywords: experts will be selected also on the basis of the keywords you used
- Easy to read, easy to understand. Help reviewers to read your proposal by underlying keywords, structuring the text with bullet points, guide them through the text etc.
- Define risks. Even if there is no risk, show that you had carefully analyzed the likelihood!
- Quantify! Provide indicators that can help to evaluate the (tangible) progress of your work and its impact (e.g. number of stakeholders involved; number of surveys compiled; number of skilled cultural heritage workers by the end of the project, etc.)
- Highlight the complementarity of the parties to the consortium
- Don't oversell your idea
- Don't underestimate the construction of the budget and the project management architecture
- ...don't rush! Writing a proposal is a project itself!

HORIZON EUROPE

The Model Grant Agreement

What is the grant agreement and why do I need it?

Contractual document signed with a 'granting authority' (e.g. *the Commission or one of its executive agencies*) that defines:

YOUR RIGHTS

- **To receive EU funding** under the terms and conditions defined in the GA
- **To own the results** of the project that you have generated
- **To ask for amendments** if needed

YOUR OBLIGATIONS

- **To implement the project** as described in **Annex 1** to the grant agreement
- **To submit reports** as defined in the grant agreement
- **To display the EU emblem and reference to Horizon Europe funding**

HOW MUCH MONEY YOU CAN GET

Maximum grant amount

Novelties

e-GRANT

HORIZON EUROPE

Participants in the action

Overview of key participants

Beneficiaries

BENEFICIARIES

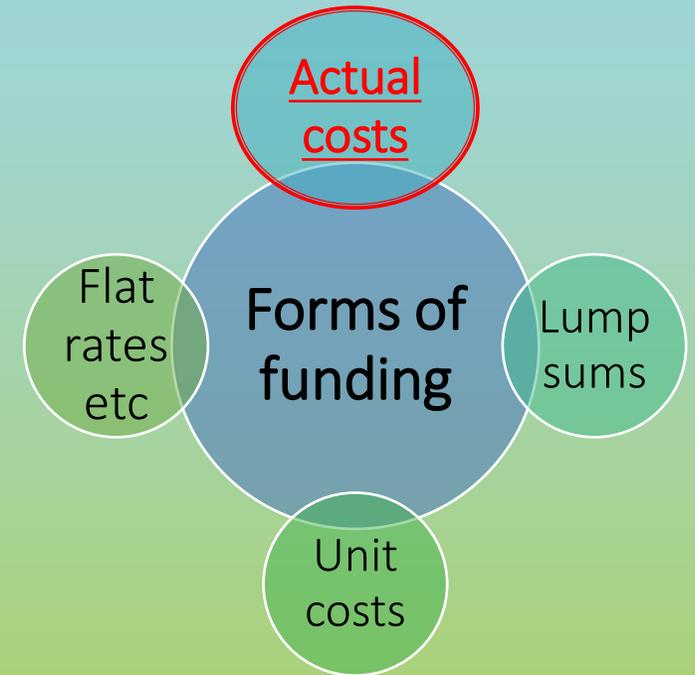

COORDINATOR

- **Signatories** --> **Accession form**
- Must remain **eligible** under HE for the entire duration
- Must have the **appropriate resources**
- **Fully responsible** towards the granting authority for implementing the action and complying with all its obligation
- Jointly responsible for the **technical implementation**
- **Obligations:**
 - ❖ Submit reports and deliverables
 - ❖ inform of any events likely to affect the action

- Central **contact point** for the granting authority
- **Directly sign** the Grant Agreement
- **Represents** the consortium (towards the granting authority)
 - *For mono-beneficiary grants --> also coordinator role*
- **Obligations**
 - ❖ **monitor** that the action is implemented properly
 - ❖ act as **intermediary** for all communications:
 - E.g. request and review any documents before passing them to the granting authority
 - ❖ **distribute** the payments received from the GA to the other beneficiaries without unjustified delay

HORIZON EUROPE

Types of costs

Actual costs – General eligibility conditions

- **actually** incurred by the beneficiary
- incurred during the **action duration**
- declared under one of the **budget categories**
- incurred **in connection with the action** (Annex 1) and **necessary** for its implementation
- **identifiable and verifiable** --> in particular **recorded** in the beneficiary's accounts in accordance with the accounting standards applicable in the country where the beneficiary is established and with the beneficiary's **usual cost accounting practices**
- comply with the **applicable national law** on taxes, labour and social security and
- be **reasonable**, **justified** and comply with **sound financial management**, in particular regarding economy and efficiency

Overview type of costs

PERSONNEL COSTS

❖ Cost of the time worked for the project by:

- **A.1** Employees
- **A.2** Natural person under direct contract
- **A.3** Seconded person
- **A.4** SME owners and natural person beneficiaries

SUBCONTRACTING COSTS

❖ You contract another entity to do action tasks as described in Annex 1

PURCHASE COSTS

- ❖ Travel and subsistence costs
- ❖ Equipment
- ❖ Other goods, works and services

OTHER COST CATEGORIES

e.g.

- ❖ Financial support to third parties
- ❖ Internal invoices
Cost charged internally from one department to another of the same beneficiary if defined cost accounting method

INDIRECT COSTS

❖ 25% flat rate

Recipient

Subcontracting (Art. 6.2.B HE MGA)

- Subcontracts concern the implementation of **action tasks** - parts of the project/project tasks that have been outsourced - Usually containing a **profit** margin for the subcontractor
→ *The beneficiary can declare the **price** paid to the subcontractor*
- ⚠ • Ensure **best value for money** (or lowest price) and avoid conflict of interests
- Subcontracting between beneficiaries is not allowed
Subcontracting to affiliates is generally not allowed either.
- The **beneficiaries are responsible** for the proper implementation of the action tasks subcontracted (*proper quality, timely delivery, etc*).
- Only limited parts of the action may be subcontracted — unless otherwise allowed in the call conditions.
- Estimated costs and tasks must be **identified in the budget and in Annex 1**

Simplified approval procedure allowed (i.e. beneficiary flags the subcontracting at reporting stage). However, beneficiary bears the risk of rejection

Purchase costs (Art. 6.2.C HE MGA)

common eligibility rules for purchase costs

- must fulfil the general eligibility conditions and
- must be bought using the beneficiary's usual purchasing practices, provided the following is ensured:
 - ✓ best value for money (or if appropriate the lowest price) and
 - ✓ no conflict of interests

C.1 travel and subsistence

For necessary trips

C.2 Equipment

- Depreciation costs (by default)
- Full costs for all or some equipment (3 options)

C.3 Other goods, works and services

C.3 Other goods, works and services

What? Necessary for the action but not covering an action task

e.g. consumables and supplies, promotion, dissemination, protection of results, translations, publications, certificates if required under the Agreement.

- Not what falls under indirect costs as per the beneficiary's usual practice.
- The cost is the amount paid by the beneficiary for the supply.

Purchases between beneficiaries: in principle not accepted - exceptionally accepted for properly justified cases

Best value for money

→ Cost must be reasonable and comply with the principle of sound financial management

- Default approach: **competitive selection**
Or prove compliance otherwise (prior competition, market consultation, etc.)
- The criteria defining quality must be clear and coherent with the purpose
- ❑ Beneficiaries that are ‘**contracting authorities/entities**’ must also comply with the applicable national law **on public procurement**
- ❑ **Framework contracts** can be used for selecting a provider if this is the usual practice of the beneficiary

FOCUS ON

Personnel costs

What are the categories of personnel? (Art 6.2.A Horizon Europe MGA)

A.1 EMPLOYEES (OR EQUIVALENT)

- ❖ For your personnel working under an **employment contract** (or **equivalent appointing act**, e.g. for civil servants) and assigned to the action.

Three cases:

- ✓ Employees with a fixed salary
- ✓ Employees whose remuneration increases when working in projects (**‘project-based remuneration’**)
- ✓ Employees of a beneficiary whose usual cost accounting practice is to calculate average personnel costs (**‘average personnel costs’**)

A.2 PERSONS UNDER DIRECT CONTRACT & A.3 SECONDED PERSONS AGAINST PAYMENT

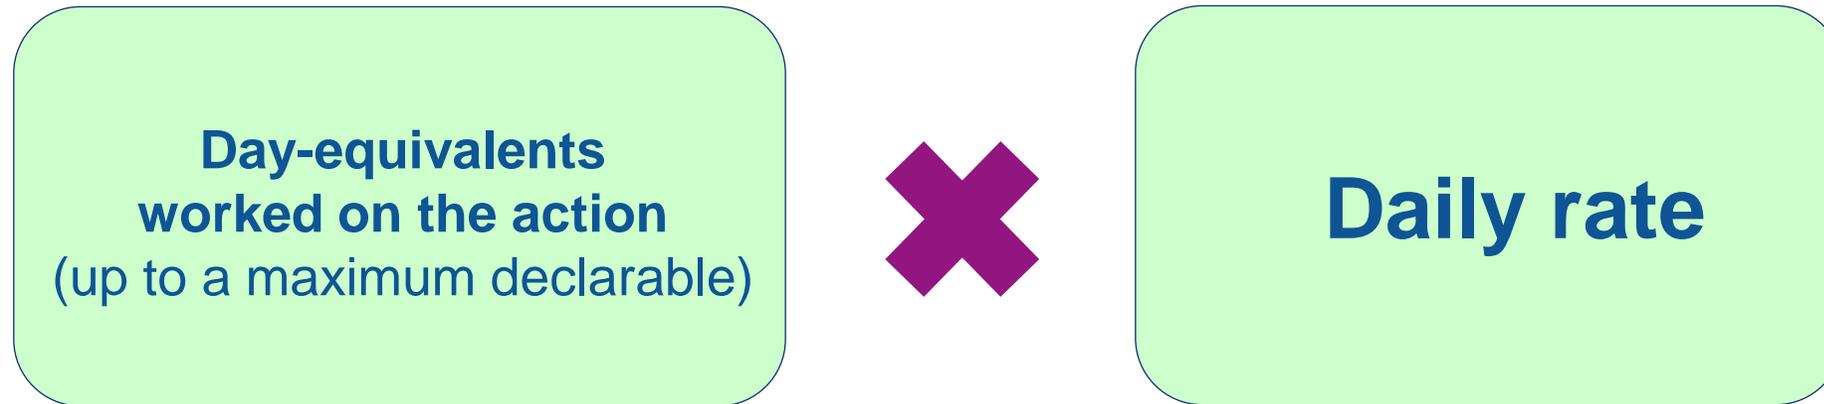

- ❖ A.2 Natural persons with a **direct contract other than an employment contract**
- ❖ A.3 Persons seconded **by a third party against payment**
 - work under conditions similar to an employee*
 - results belong to the beneficiary*

A.4 SME OWNERS AND NATURAL PERSON BENEFICIARIES

- ❖ Costs for SME owners **not receiving a salary** or
- ❖ Costs for **natural person beneficiaries not receiving a salary**

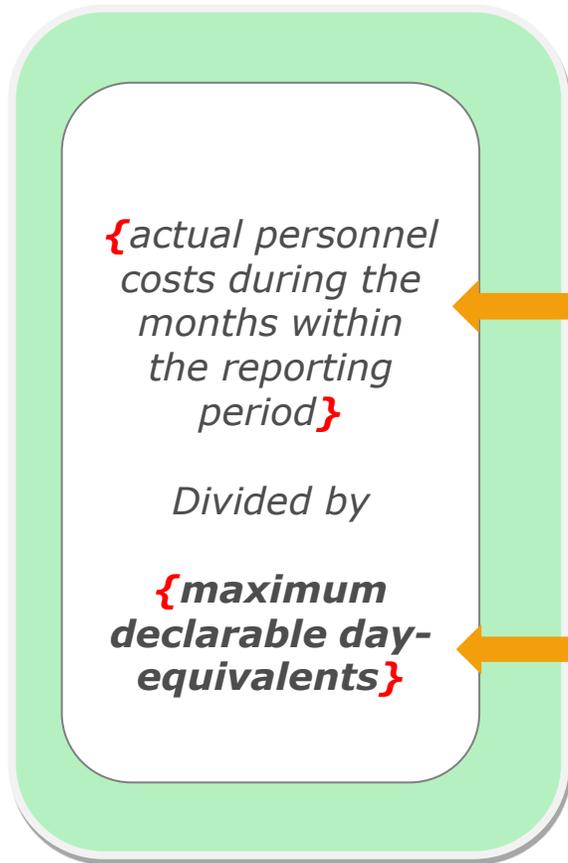

How to calculate your personnel costs?

Category A.1 – case 1: Employees with a fixed salary

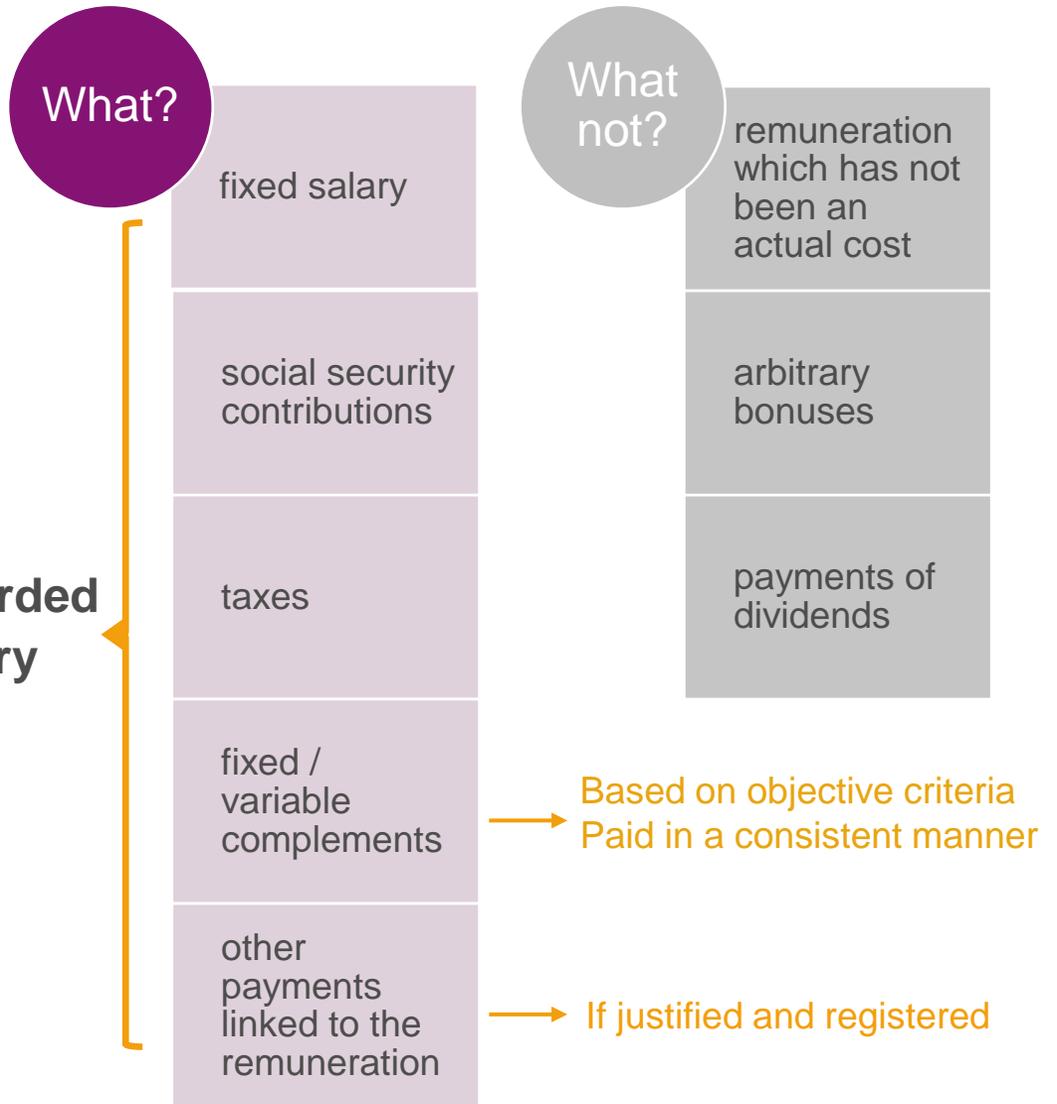

- *Simplification with Commission-wide formula (valid across EU programmes)*
- *Single calculation for the reporting period*
- *Per person who worked in the action*
- *Adaptable formula to cover various situations*

Calculation of the daily rate

Eligible cost recorded in your statutory accounts

Pro-rata of 215

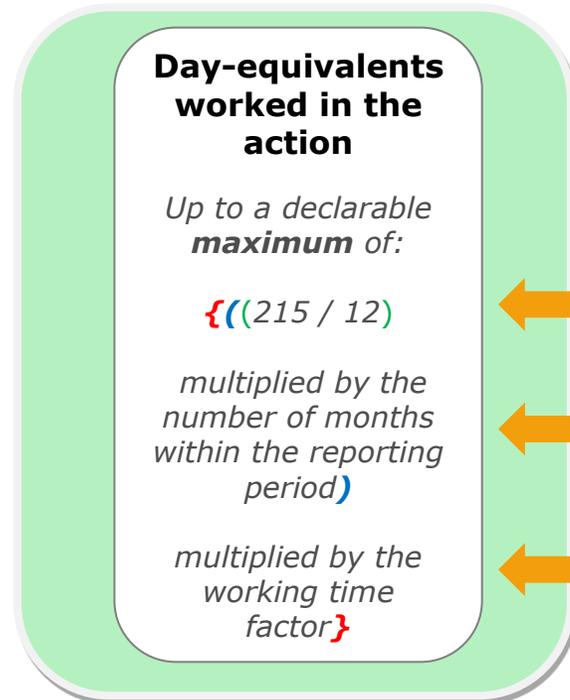

Days-equivalents worked in the action

- Sum of the day-equivalents actually worked in the action
- Recorded
 - reliable time-recording system
 - monthly declaration on days spent for the action - **Commission template:**

Consistency

EU GRANTS DECLARATION OF DAYS WORKED ON A PROJECT		YEAR:		
<i>To be filled in and uploaded as deliverable in the Funding & Tenders Portal Grant Management System, at the due date foreseen in the system.</i>				
Project acronym:		Project number:		
Participant name:				
Name of the person:		Type of personnel: <small>(employee/ natural person under direct contract/ seconded/ other)</small>		
Month	Days worked in the action ¹ <small>(e.g. 15, 7,5, 0,5)</small>	Work Packages worked on <small>(e.g. WP2; WP5)</small>	Date and signature of the person	Name, date and signature of the supervisor
January			Signature: Date:	Name: Signature: Date:
			Signature:	Name:

Maximum declarable day-equivalents

Pro-rata of 215

during which the person is employed

0,5 for 50% part-time etc.

Double capping:

✓ **Horizontal ceiling:** the actual number of day-equivalents declared accross EU and Euratom grants cannot be higher than **215 per calendar year**

✓ **Reporting period ceiling:** the number of days-equivalents to be declared is **capped at the maximum declarable day-equivalents per reporting period**

NEW!

Disclaimer: Information not legally binding

European
Commission

Project-based remuneration at a glance

Category A.1 – case 2: Project based remuneration

WHAT IS IT?

- ❖ Usual remuneration practices under which **personnel receives supplementary payments for work in projects**

HOW MUCH CAN BE DECLARED?

- ❖ Salary paid for the time worked by the personnel in the **action up to the remuneration that would be paid for work in R&I projects funded by national schemes**

METHODOLOGY?

- ❖ **Compare**

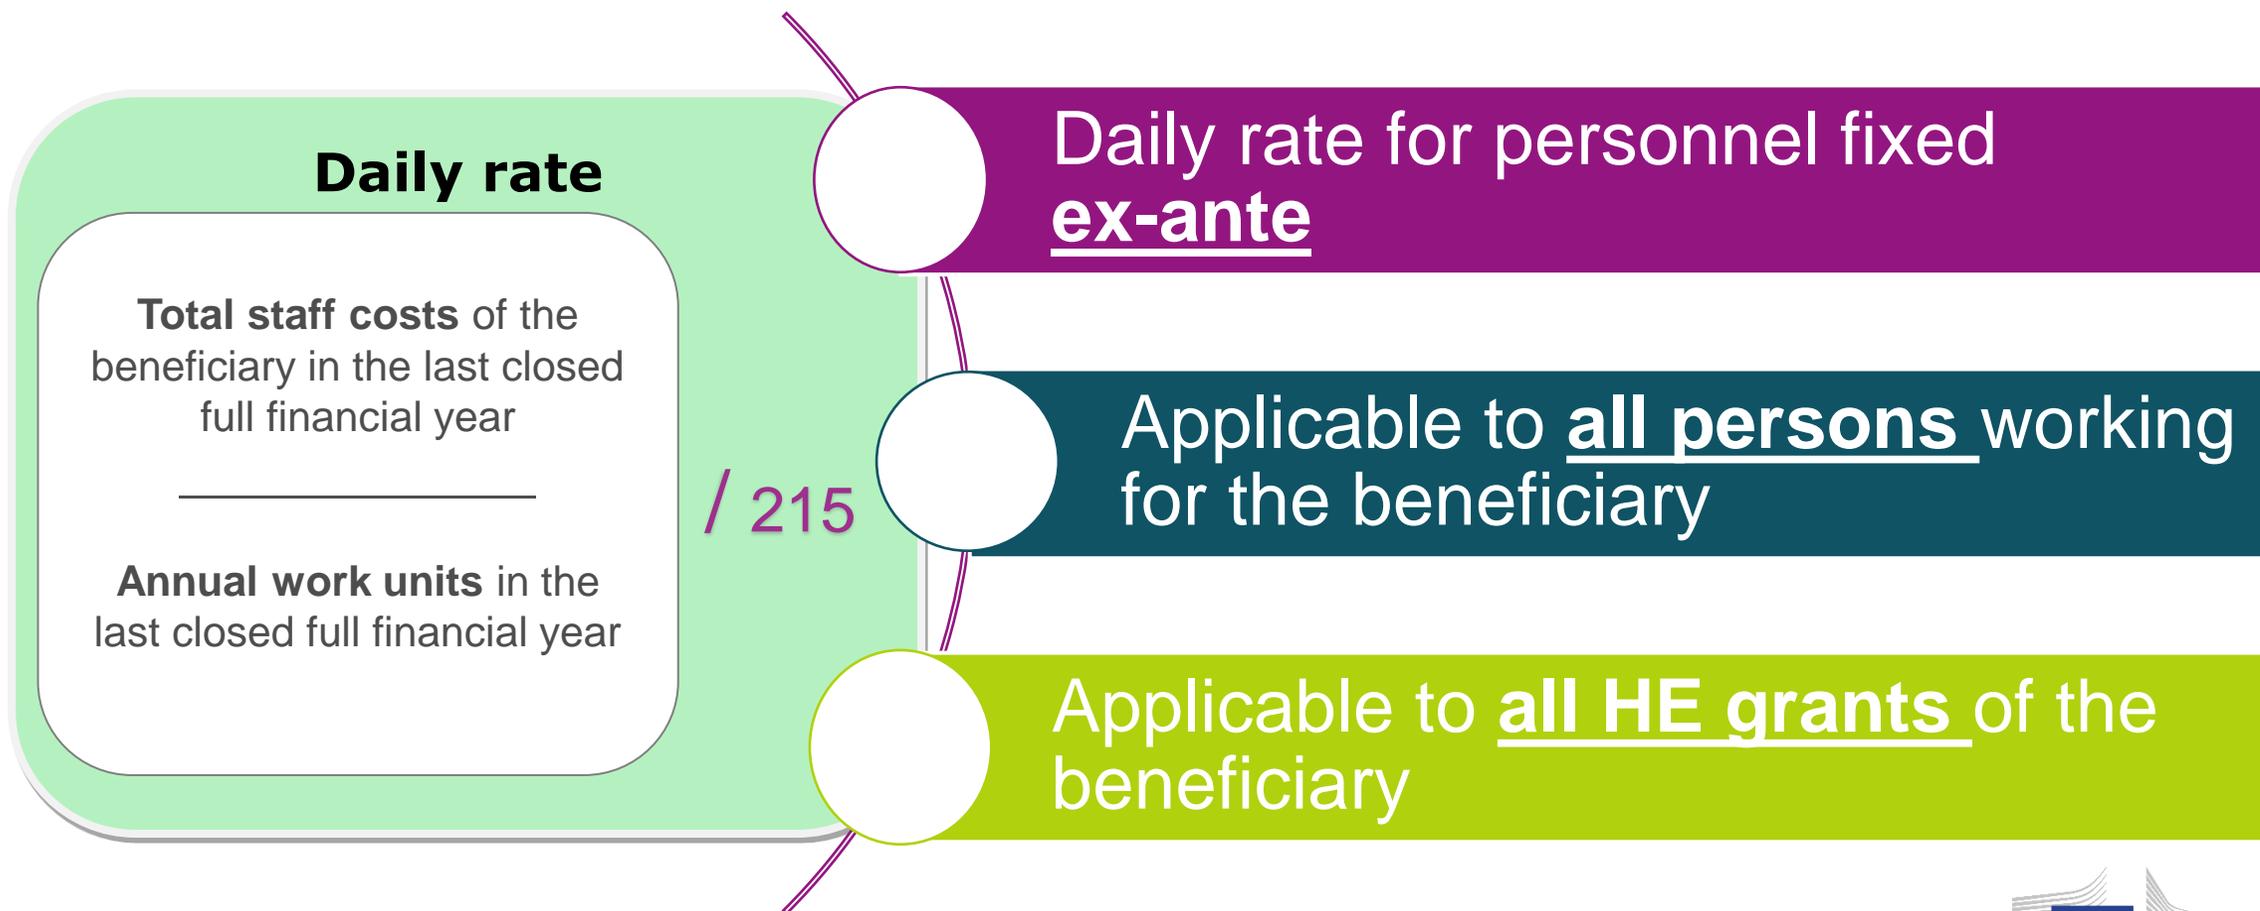

- ❖ **Lower of the two**

Too complicated?

The **NEW!** optional unit cost for personnel!*

**coming soon*

C.1 travel and subsistence

What costs?

- Travel
- Accommodation
- Subsistence

Specific eligibility conditions

Travel, accommodation and subsistence costs must be declared:

- on the basis of the costs actually incurred and
- in line with the beneficiary's usual practices

Combined travel (e.g. where the end point of travel is different from the start)

- Eligible **ONLY** up to the cost that **would have been incurred if the travel would have been made exclusively for the action** (i.e. up to the theoretical cost of travelling directly back to the start point)
- must be the usual practice of the beneficiary to pay for such travels (e.g. travels combining professional and personal reasons)

C.2 Equipment

- **By default**, depreciation costs are eligible
 - ⚠️ *Only the portion of the costs that corresponds to the rate of actual use for the action during the action duration can be taken into account*
- **By exception**, full costs may be eligible.

Optional provisions in the HE MGA addressing the specific case of **assets under construction (e.g. prototype)** and their related **capitalised costs**, like:

- the costs of the personnel involved in the construction of the prototype
- component, pieces of equipment bought for the prototype

Equipment costs – Options available in the HE MGA

Four options:

[OPTION 1 **by default:** depreciation only]

[OPTION 2 if selected for the call: full cost only]

[OPTION 3 if selected for the call: depreciation and full cost for listed equipment]

[OPTION 4 if selected for the call: full cost and depreciation for listed equipment]

- Options 2, 3 and 4 are **exceptions**, if justified by the nature of the actions and the context of the use of the equipment or assets (i.e. for a limited number of calls, notably for calls for which the purpose is for instance to have beneficiaries developing prototypes)
- Option 2, 3 and 4 can only be activated in a specific grant if **it was selected for the call by the granting authority**

 In practice, applicants must check **if the call and topic includes any particular conditions for equipment costs eligibility**

Internal invoicing

What? Costs for goods and services which are produced or provided within the beneficiary's organisation directly for the action and the beneficiary values on the basis of its usual cost accounting practices.

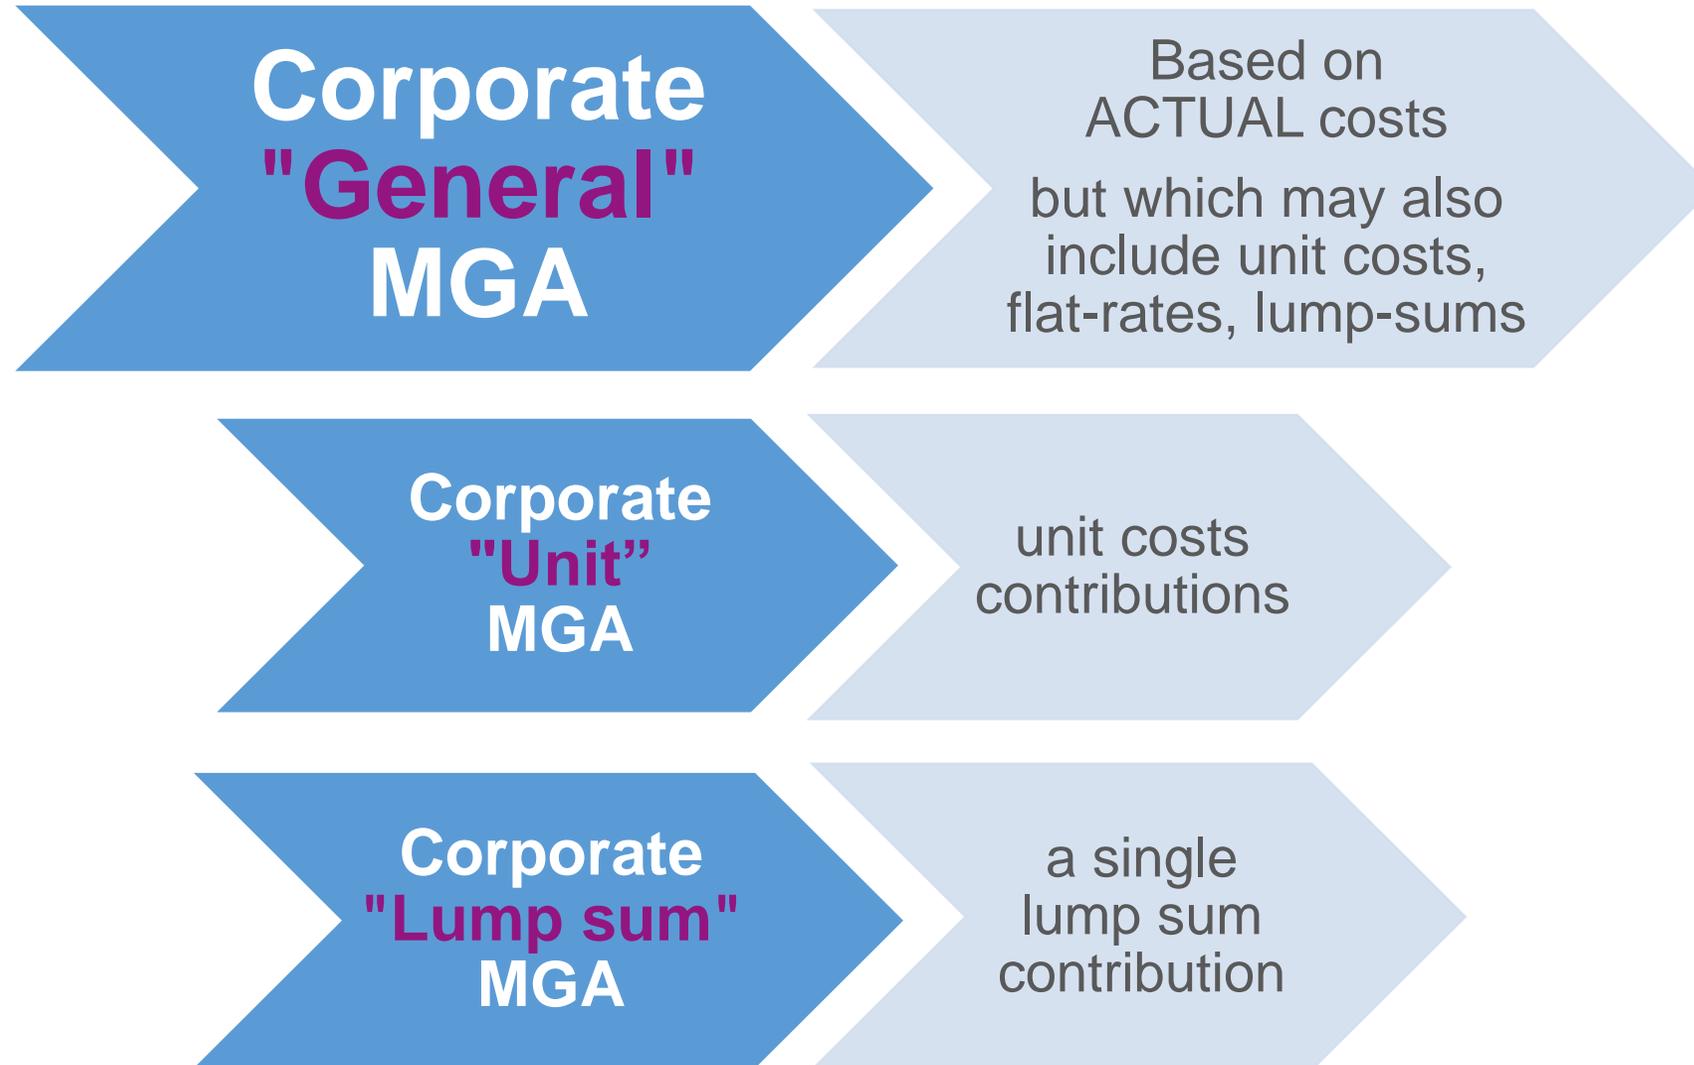

Examples:

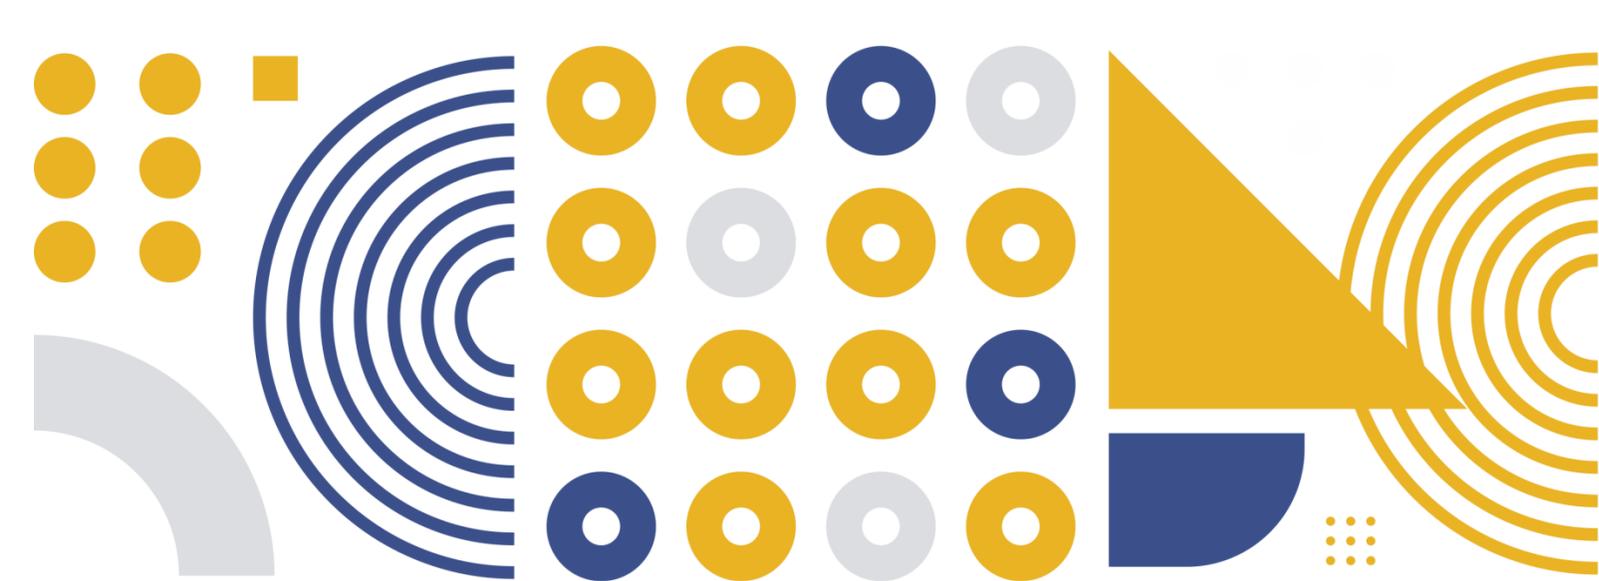

- *self-produced consumables (e.g. electronic wafers, chemicals)*
- *specialised premises for hosting the research specimens used for the action (e.g. animal house, greenhouse, aquarium)*
- *standardised testing or research processes (e.g. genomic test, mass spectrometry analysis)*
- *use of specific research devices or research facilities (e.g. clean room, wind tunnel, supercomputer facilities, electronic microscope)*

NEW Wider reliance on beneficiary's usual cost accounting practices for the unit cost calculation with:

- ❖ No application of the 25% flat-rate on top of the unit cost (*H2020 rules*)
- ❖ instead, possibility to accept actual indirect costs allocated via **beneficiary's usual key drivers** in the unit cost calculation

Dissemination & Exploitation of research results

KATRINA BARKANE

15 MARCH 2024

Can I get support for
exploiting (=using)
the results of my project?

YES!

AGENDA

- Legal basis
- Key concepts
- Support ecosystem

Towards an
integrated dissemination &
exploitation ecosystem

LEGAL BASIS

European
Commission

Towards an
integrated dissemination &
exploitation ecosystem

Horizon Europe Regulation (EU) 2021/695

Unless the work programme / grant agreement specify otherwise

Article 39 – Exploitation and Dissemination

1. Each beneficiary that has received Union funding shall **use its best efforts to exploit the results** it owns, or to have them exploited by another legal entity. [...]

If, despite a beneficiary's best efforts to exploit its results directly or indirectly, **the results are not exploited within a given period as established in the grant agreement**, the beneficiary shall use an appropriate **online platform** as identified in the grant agreement to find interested parties to exploit those results.

2. **Beneficiaries shall disseminate their results** as soon as it is feasible, in a publicly available format, [...].

6. Unless the work programme provides otherwise, proposals shall include **a plan for the exploitation and dissemination of the results**. If the expected exploitation of the results entails developing, creating, manufacturing and marketing a product or process, or in creating and providing a service, the plan shall include a **strategy for such exploitation**. [...]

KEY CONCEPTS

European
Commission

Towards an
integrated dissemination &
exploitation ecosystem

FOCUS ON RESULTS

Any tangible or intangible output of the action:

=> e.g. data, know-how & information whatever their form or nature, whether or not they can be protected.

! Key exploitable results (KERs) => can be used and create impact, either by the project partners or by other stakeholders

Projects results can be exploitable, for example, inventions, prototypes, services, knowledge, technology, processes, networks

COMMUNICATION

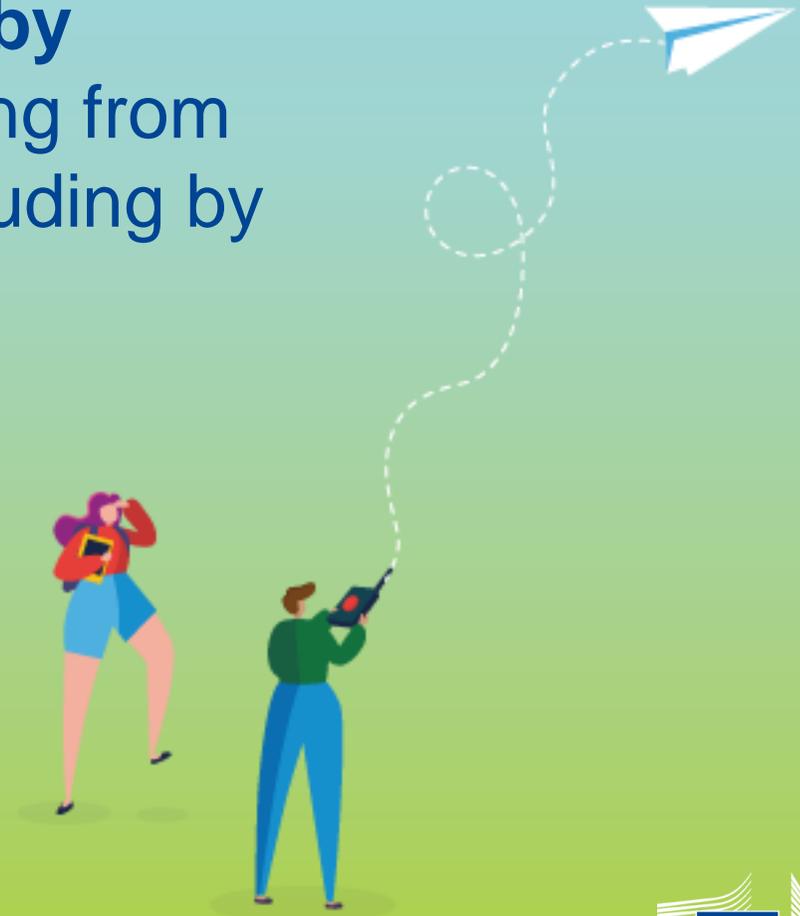

Communication measures should promote the project throughout the full lifespan of the project. The aim is **to inform and reach out to society and show the activities performed, and the use and the benefits the project** will have for citizens.

DISSEMINATION

The **public disclosure of the results by appropriate means**, other than resulting from protecting or exploiting the results, including by scientific publications in any medium.

Make results available to scientific community, industry, commercial players, policymakers,

EXPLOITATION

The **use of results** in further research and innovation activities other than those covered by the action concerned, **including** among other things, **commercial exploitation** such as **developing, creating, manufacturing and marketing a product or process, creating and providing a service, or in standardisation activities.**

Communication

Taking **strategic and targeted measures for promoting the action itself** and its results to a multitude of audiences, including the media and the public, and possibly engaging in a two-way exchange.

- **Reach out to society as a whole.**
- Demonstrate how EU funding contributes to tackling societal challenges.
- Strategically planned with pertinent messages, right medium and means.

Dissemination

The **public disclosure of the results by appropriate means**, other than resulting from protecting or exploiting the results, including by scientific publications in any medium.

- **Circulation of knowledge & results to those who can best make use of them.**
- Enabling the value of results to be potentially wider than the original focus.
- Essential element of all good research practice and vital part of the project plan.

Exploitation

The **use of results** in further research and innovation activities, including among other things, commercial exploitation such as developing, creating, manufacturing and marketing a product or process, creating and providing a service, or in standardisation and policy making activities.

- Recognise exploitable results and their stakeholders, identify the value added from their use.
- Beneficiaries can use their results or let them being exploited (=used) by interested third parties.

Towards an integrated dissemination & exploitation ecosystem

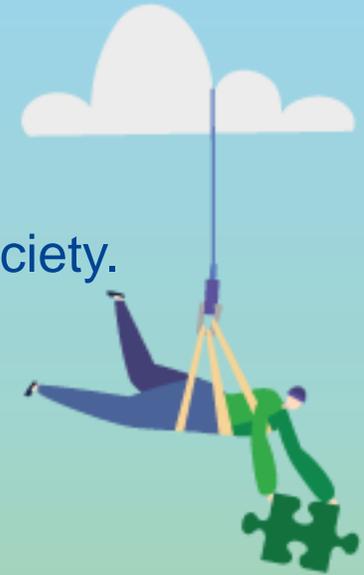

WHY DO WE CARE? → IMPACT

Better dissemination and exploitation of the project results contributes to:

- More effective circulation of knowledge and new ideas.**
- Evidence-based policymaking.**
- Increase of the innovation potential & the creation of new business opportunities.**
- Maximisation of the impact created through the R&I investments.**
- ...**

WHAT'S IN IT FOR THE PROJECTS?

- Using their results to create impact & contribute to the wellbeing of our society.
- Increasing **visibility** of research/business.
- Improving **reputation**.
- Widening **knowledge sharing** and catering for **knowledge to be built upon**.
- Enhancing **market, policy and scientific use of research results**.
- Attracting other **funding sources** and potential **business opportunities** .
- ...

D&E lifecycle

After the end

..

Early stage

Review - update

Towards the end

..

Application

Plan => admissibility
criteria

D&E plan

Dissemination & Exploitation

To include a draft plan in proposal is an **admissibility condition**, unless the work programme explicitly states otherwise.

All measures should be **proportionate** to the scale of the project, and should contain **specific actions** to be implemented both **during and after** the end of the project.

Key elements of the D&E plan:

- **Planned measures** to maximise the impact of project results.
- **Target groups** (e.g. scientific community, end users, financial actors, general public) and **proposed channels**.
- **Communication measures** for promoting the project and its findings throughout the full lifespan of the project.
- **Policy feedback** measures to contribute to policy making.
- Comprehensive and feasible strategy for the **management of the intellectual property** and **justification** that exploitation is still in the Union's interest, if it is expected primarily in non-associated third countries.

SUPPORT ECOSYSTEM

European
Commission

Towards an
integrated dissemination &
exploitation ecosystem

Horizon Europe Regulation (EU) 2021/695

Article 51: Information, communication, publicity and dissemination and exploitation

*The Commission shall also establish a **dissemination and exploitation strategy** [...] to accelerate exploitation towards market uptake and boost the impact of the Programme.*

Dissemination & Exploitation strategy

Guide and Train applicants and beneficiaries by offering dissemination & exploitation capacity building activities.

Motivate beneficiaries with incentives to scale up their results.

Support beneficiaries by offering targeted Dissemination & Exploitation services, including on Intellectual Property management.

Synergise with other EU programmes and initiatives.

D&E ecosystem – who is here?

CORDIS

Horizon Results Platform

- ❑ **What?** European Commission's **corporate platform** for Key Exploitable results.
- ❑ **Why?** To promote innovative EU-funded research & innovation solutions to investors, policy makers and beyond!
- ❑ **Who?** FP7, Horizon 2020, Horizon Europe, European Maritime and Fisheries Fund, Research for Coal and Steel, EIT-KICS and more to come.

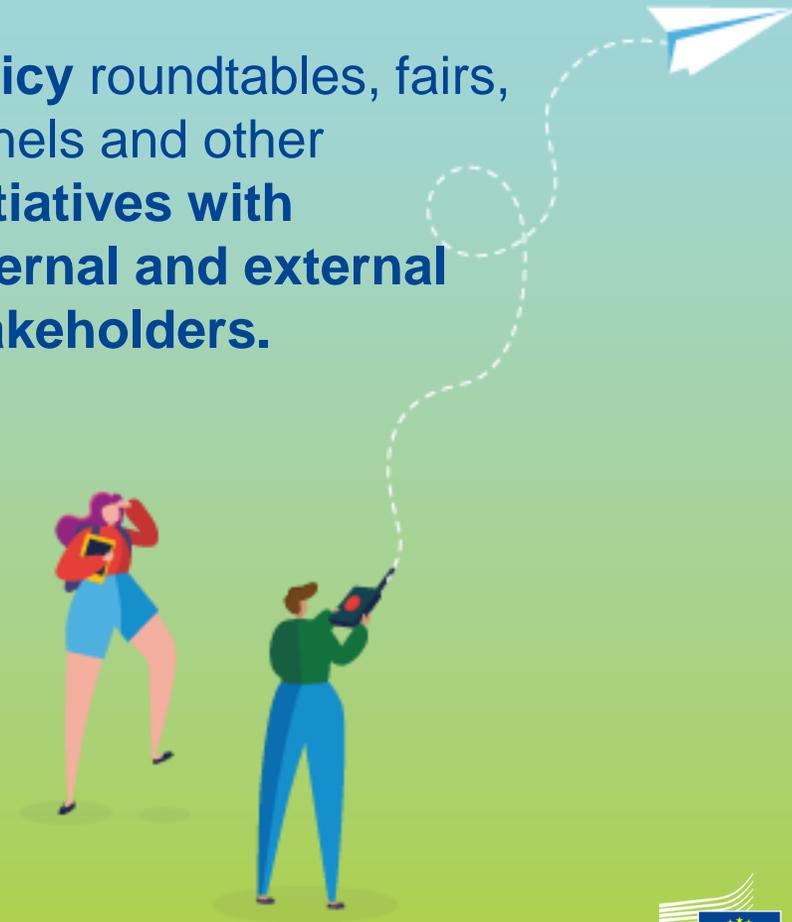

HORIZON RESULTS PLATFORM

MARKET-ORIENTED

- **Investor events** for the more mature, investment-ready solutions/companies.
- **Matchmaking** with the help of networks such as Enterprise Europe Network, European business angel networks, Solar Impulse Foundation, BlueInvest, and others.
- **Dedicated training sessions** to accelerate uptake of results e.g. on managing IP, entrepreneurship etc.
- **Media coverage** and outreach campaigns.

POLICY-RELEVANT

- **Policy** roundtables, fairs, panels and other **initiatives with internal and external stakeholders.**

HORIZON
RESULTS PLATFORM

MAKING RESULTS MATTER

Horizon Results Booster

- ❑ **What?** An **initiative** of the European Commission with **free-of-charge support services**.
- ❑ **Why?** To facilitate further dissemination & exploitation and to maximize the impact of EU-funded research results.
- ❑ **Who?** Closed and ongoing projects funded by FP7, H2020 and Horizon Europe.

HORIZON RESULTS BOOSTER → AVAILABLE NOW

Portfolio Dissemination & Exploitation Strategy

- Identify and create the portfolio of R&I project results
- Help projects to design and execute dissemination plans
- Assist projects in improving their existing exploitation strategy

Business Plan Development

- Support for bringing research results closer to the market:
- Develop an effective business plan
 - Prepare to secure appropriate funding

Go To Market

- Support for commercialisation:
- Pitching
 - Intellectual Property Rights
 - Innovation management
 - Business services
 - Business implementation options
 - Non-EU funding opportunities

Horizon Results Booster-II

To be launched in 2024

- New and extended services incl. from **'go to market'** to **'go to policy'** and beyond
- More **flexibility** (groups of projects, individual projects or results)
- Possibility for more **tailor-made follow up**
- Dedicated (series of) **events**
- ...

HORIZON RESULTS BOOSTER-II → COMING IN 2024

Personalised Support

- Entry level consultation to assist the beneficiaries to choose the best services
- Follow-up support to review the needs

D&E Building Blocks

- Dissemination plan
- Go to Applied Research support
- Go to Market support
- Go to Policy support

Add-on services

- Networking
- Portfolio analysis
- Intellectual assets management
- Public speaking coaching
- Audio-visual support
- ---

Information on projects ..

Horizon Dashboard

- **Source of data and statistics** on projects founded since FP1 until Horizon Europe.
- Focus on **visualisation**, customized filters to your own specific needs & export of data, graphs, maps.
- Place of reference for country profiles.

CORDIS

- **Public repository** with general information on R&I FP projects.
- Information on the **projects and results**, such as:
 - Participants list, reports, deliverables and links to open-access publications
 - Project factsheets, results packs, results in brief, news items, podcasts and more.

Extra support for Widening .. → Coordination & Support Action Dissemination and Exploitation Support Facility (HORIZON-WIDERA-2023-ACCESS-05)

Dedicated project to support ‘go to market’ in widening countries

- Valorization of research results at TRL 4 to 7
- Creates links between academic players and potential market
- Develops skills for researchers and innovators in widening actions
- Collect and share best practices for uptake of R&I results
- Greater recognition of beneficiaries based in widening countries
- ...
